

Compass User Guide

The complete, non-technical handbook for administrators, teachers, students, parents, specialist staff, and platform owners.

School Management Platform · End-User Documentation

Every screen, every task, step by step

Revised 2026-09-06

Contents

How this guide is organised

Part 1 — The Basics

- 1.1 What Compasse is
- 1.2 What you need
- 1.3 Signing in
- 1.4 If you forget your password
- 1.5 First login — change your password
- 1.6 Finding your way around
- 1.7 The Dashboard
- 1.8 Roles at a glance

Part 2 — School Administrator

- 2.1 One-time setup checklist
- 2.2 Academic structure — the "Academic Management" screen
- 2.3 Students — the "Students" screen
- 2.4 Subjects — the "Subjects" screen
- 2.5 Teachers, Staff, Users and Role Access
- 2.6 Admissions — the "Admissions" screen
- 2.7 Result configuration & grading
- 2.8 Finance — the "Finance" screen
- 2.9 Payroll — the "Payroll" screen
- 2.10 Attendance oversight — the "Attendance" screen
- 2.11 Operations modules
- 2.12 Communication — the "Communication" screen
- 2.13 Settings — the "School Settings" screen
- 2.14 Subscription & modules

Part 3 — Teacher

- 3.1 Your dashboard
- 3.2 My Timetable
- 3.3 My Signature
- 3.4 Classes & Subjects
- 3.5 CBT / Exams — the "Assessment & CBT" screen
- 3.6 Scores & Results — the "Scores" screen
- 3.7 Checkpoint & class reports
- 3.8 Attendance
- 3.9 Communication & Library

Part 4 — Student

- 4.1 Dashboard
- 4.2 My Courses
- 4.3 My Exams — taking a CBT
- 4.4 My Results

4.5 My Fees

4.6 Messages, Events, Library, Meetings

Part 5 — Parent / Guardian

5.1 Dashboard

5.2 My Children & switching between them

5.3 Ward results & courses

5.4 Fees (Ward Fees)

5.5 Messages & Events

Part 6 — Specialist Staff

6.1 Accountant

6.2 Librarian

6.3 Nurse

6.4 Driver

6.5 Security

6.6 Housemaster

6.7 General staff / Caterer / Cleaner

Part 7 — Platform Owner (Super Administrator)

7.1 Signing in

7.2 The console menu

7.3 Creating a new school

7.4 Managing an existing school

7.5 Plans

Part 8 — Quick Reference & Troubleshooting

8.1 "How do I...?" — task finder

8.2 Common problems

8.3 Glossary

Part 9 — Worked Case Studies

Case Study A — Sunrise Nursery & Kindergarten

Case Study B — Riverside Primary School

Case Study C — Greenfield Secondary School

Case Study D — St. Andrew's College (Senior / A-Level)

Case Study E — Unity Group of Schools (multi-campus)

Day-in-the-life vignettes

Compassse User Guide

The complete, non-technical handbook for everyone who uses Compassse — school administrators, principals, teachers, students, parents, accountants, librarians, nurses, drivers, security staff, and platform owners.

This guide explains **what each screen does and how to complete every task**, step by step. It does not assume any technical knowledge. Where a button, tab, or field is named exactly as it appears on screen, it is written **like this**.

How this guide is organised

Part	For whom	Start here if you are...
1 — The Basics	Everyone	New to Compassse
2 — School Administrator	Admin, Principal, Vice Principal	Setting up or running a school
3 — Teacher	Teachers, HODs, class/subject/year tutors	Teaching classes and marking
4 — Student	Students	Taking exams, checking results
5 — Parent / Guardian	Parents and guardians	Following a child's progress
6 — Specialist Staff	Accountant, Librarian, Nurse, Driver, Security, Housemaster	Running one department
7 — Platform Owner	Compassse super administrator	Managing many schools
8 — Quick Reference & Troubleshooting	Everyone	You're stuck

Part 1 — The Basics

1.1 What Compasse is

Compasse is an online school management system. Everything a school does on paper or in spreadsheets — enrolling students, setting fees, recording payments, running exams, taking attendance, sending messages home, managing the hostel, library, clinic and school bus — is done inside Compasse through a web browser.

Each school has its **own private space** on the platform, reached at its own web address:

`https://YOURSCH00L.compassse.net`

`YOURSCH00L` is the short name (the “subdomain”) chosen when the school was created — for example `greenfield.compassse.net`. One school can never see another school’s data.

The platform owner (the company running Compasse) uses a separate address to create and manage schools. That is covered in **Part 7**.

1.2 What you need

- A computer, tablet, or phone with a modern web browser (Chrome, Edge, Safari, Firefox).
- Your school’s web address.
- Your **email** and **password**. These are given to you by your school administrator. Students and parents receive theirs from the school office.
- An internet connection.

Nothing is installed. You simply open the web address.

1.3 Signing in

1. Open your school's web address, e.g. `https://greenfield.compasse.net`.
2. You land on the school's public home page. Click **Sign in** (or go straight to `.../login`).
3. The sign-in screen shows your school's name and logo. Enter your **Email** and **Password**.
4. Click **Sign in**.
5. You arrive at your **Dashboard**. What you see there depends on your role.

"No subdomain detected" — you opened the plain Compasse address instead of your school's. Re-open the page using `yourschool.compasse.net`.

"Unable to Access School" — the school's subscription is suspended or the address is mistyped. Contact your school administrator.

1.4 If you forget your password

1. On the sign-in screen click **Forgot password?**.
2. Enter your email and click **Send reset link**.
3. Check your email inbox for a message from Compasse and follow the link to set a new password.
4. If no email arrives within a few minutes, check spam, then ask your school office to resend your credentials.

1.5 First login — change your password

Accounts created by the school start with a temporary password. Change it immediately:

1. In the left sidebar, near the bottom, click **Change Password**.

2. Enter your **Current Password**, then a **New Password** (at least 8 characters) twice.
3. Click **Update**.

1.6 Finding your way around

Every screen after sign-in has the same layout:

- **Left sidebar** — your menu. Items are grouped under headings such as **Overview**, **People**, **Academics**, **Operations**, **Finance**, **Communication**, **My Portal**, and **System**. Click a group heading to collapse or expand it. Click the arrow at the bottom of the sidebar to shrink the whole sidebar to icons only.
- **Main area** — the screen you selected.
- **Bottom of sidebar** — a light/dark theme switch, **Change Password**, and your name (click it to **log out**).

You only see the menu items your role is allowed to use. A teacher does not see Finance; a student sees only their own portal. If your school's plan does not include a feature (for example Hostel), that menu item is hidden.

1.7 The Dashboard

The **Dashboard** is the first screen after sign-in. It is tailored to your role and shows the numbers and shortcuts that matter to you — for an administrator, school-wide totals and money collected; for a teacher, today's classes and pending marking; for a student, upcoming exams and latest results; for a parent, each child's attendance, results and fee balance.

1.8 Roles at a glance

Role	Sees / does
Admin / School Admin	Everything in the school
Principal / Vice Principal	Everything academic and operational; most admin screens
HOD (Head of Department)	Their department's subjects, classes, staff and reports
Teacher (incl. class teacher, subject teacher, year tutor)	Their classes and subjects, exams, scores, attendance, reports
Student	Own courses, exams, results, fees, messages
Parent / Guardian	Each linked child's results, courses, fees, messages
Accountant	Fees, invoices, payments, payroll
Librarian	Library catalogue, lending, digital resources; inventory
Nurse	Clinic records, appointments, medications; inventory
Driver	Assigned bus routes, trips, student pickups
Security	Gate passes, visitor check-in, incident reports, secure pickup
Housemaster	Hostel rooms, allocations, maintenance
Staff / Caterer / Cleaner	Personal dashboard: payslips, notices, events

A person can hold more than one role (for example a teacher who is also an HOD). The menu then shows the combined set of screens.

Part 2 — School Administrator

This part is for **Admin / School Admin**, and largely applies to **Principal** and **Vice Principal** too. It is arranged in the order you would set up a school and then run it term by term.

2.1 One-time setup checklist

Do these once, in order, before enrolling anyone:

1. **Settings** – school name, logo, colours, contact details, landing page (2.13).
2. **Academic session & terms** – the current year and its terms (2.2).
3. **Class Levels** – the rungs of your school, e.g. JSS1, JSS2 ... SS3 (2.2).
4. **Departments** – e.g. Sciences, Arts, Commercial (2.2).
5. **Classes & Arms** – actual classes (JSS1) and their sections/arms (A, B, C) (2.2).
6. **Subjects** – every subject, linked to a department, assigned to classes and teachers (2.4).
7. **Result settings & grading** – grade boundaries and report-card rules (2.7).
8. **Fee structure** – fee breakdowns per class and term (2.8).
9. **Teachers & Staff** – add people and give them portal logins (2.5).
10. **Students** – enrol students and link guardians (2.3).

2.2 Academic structure — the “Academic Management” screen

Open **Academics** → **Classes**. This screen has four tabs.

Tab: Academic Session

- Click **Add** to create a session (e.g. “2025/2026”) with a **Start Date** and **End Date**.
- Add **Terms** inside a session (e.g. First Term) with their own start/end dates and, if relevant, **Next Term Begins**.
- Tick **Set as current academic session** / **Set as current term** so the rest of the system (fees, results, attendance) knows which period is live.

Tab: Class Levels

- Click **Add**, give a **Name** (e.g. “JSS 1”) and a **Sort Order** so levels list in the right sequence.

Tab: Departments & Subjects

- Click **Add** to create a **Department** with a **Name**, **Code**, optional **Description**, and a **Head of Department**.
- Subjects are managed on their own screen (2.4) but appear here grouped by department.

Tab: Classes & Arms

- **Add** a class: choose its **Level**, give it a **Class Name**, assign a **Class Teacher**, and optionally a **Capacity**.
- Add **Arms** (sections) such as A, B, C. Arms are shared school-wide; use **Quick-add existing section** to attach an existing arm to this class, or create a new **Section Name**.
- Each class row shows its class teacher and lets you edit or delete it.

2.3 Students – the “Students” screen

Open **People** → **Students**.

Enrol one student

1. Click **Enroll New Student**.
2. Fill **First Name** and **Last Name** (required), plus **Middle Name**, **Gender**, **Date of Birth**, **Nationality**, **State of Origin**, **Religion**, **Blood Group**, **Genotype**, **Address**, **Phone** as available.
3. Set the **Class**, **Arm**, **Academic Year** and **Term** of enrolment. Optionally set **Admission No.** (left blank, the system assigns one) and **Status**.
4. Add a **Primary guardian**: name, **Relationship**, **Phone**, **Email**, **Occupation**, **Address**. You can **Add Guardian** for more than one.
5. Optionally add a **Profile Photo** and a **Student email** (needed if the student will log in).
6. Click save.

Login credentials for students and guardians

- If the system creates a portal account during enrolment, a **Login Credentials** box appears showing the **Email**, **Username** and temporary **Password**. Copy these and give them to the family. The password must be changed on first login.
- Later, from the students list, click the **envelope icon** on a row to **e-mail the login details** to that student/guardian again.

Edit, view, remove

- **Student Profile** (click the row) shows all details and guardians.
- **Edit Student** changes any field. **Delete Student** removes the record (use with care).

Enrol many students at once (bulk upload)

1. Click **Bulk Upload** (upload icon).
2. Download the **CSV template**.

3. Fill one row per student in a spreadsheet, save as CSV.
4. Upload the file. The system reports how many rows succeeded and lists any errors to fix and re-upload.

Promotion (end of session)

Students are moved up a level from **Academics** → **CBT / Exams** → **Promotions** (see 3.7) or wherever your school runs promotions — **Auto-Promote** the whole class by a pass rule, **Bulk Promote** a selected list, or **Promote Single Student**.

2.4 Subjects — the “Subjects” screen

Open **Academics** → **Subjects**.

- **Add** a subject: **Subject Code**, name, **Department**, **Credit Units**, **Description**.
- **Assign to Class**: open a subject, choose the class (and optionally an **Arm / Section**), and a **Subject Teacher**.
- **Manage Teachers** on a subject: **Add a teacher** to co-teach.
- **Manage Enrollment** on a subject:
 - **Enroll by Class** — bulk-enrol every student in a class.
 - **Enroll by Student** — pick individual students.
 - The **Enrolled** list shows who currently takes the subject; remove students here.

2.5 Teachers, Staff, Users and Role Access

Teachers — “Teachers” screen (People → Teachers)

1. Click **Add Teacher**. Fill **First Name**, **Last Name**, **Email**, **Gender**, **Employment Date** (required), plus **Other Names**, **Phone**, **Date of Birth**, **Address**, **Qualification**, **Staff ID**, **Department**, **Employment Type**, bank details (**Bank Name**, **Account Name**, **Account Number**) for payroll, and **Status**.
2. Save. A **Login Credentials** box shows the teacher’s portal email and temporary password.
3. On a teacher’s profile, use **Subject Assignments** → **Add Assignment** to tie them to a **Subject** and **Class**.

Staff — “Staff” screen (People → Staff)

Non-teaching employees (accountant, librarian, nurse, driver, security, housemaster, cleaner, caterer, general staff). Click **Add Staff**, set **First/Last Name**, **Role** (required), **Employment Date** (required), **Department**, **Phone**, **Email**, **Status**. A portal login is created and shown.

Portal Users — “Users” screen (People → Users)

A direct way to create any login without a full HR profile. Click **Add portal user**: **Full name**, **Email**, **Role**, **Password**, **Confirm**, **Status**. Edit or delete users here. Use this for extra admins or temporary accounts.

Role Access — “Permission matrix” screen (System → Role Access)

Fine-tune what each role can do. The **Permission matrix** lists actions down the side and roles across the top; tick or untick a cell to grant or remove that permission. Use **New permission** to register a custom permission your school needs. Changes take effect on the user’s next screen load.

2.6 Admissions — the “Admissions” screen

Open **People** → **Admissions**. Two tabs.

Tab: Cycles

1. Click **New admission cycle**: **Name**, **Opens** and **Closes** dates, **Description**, target **Class**.
2. Optionally build an **entrance exam**: set **Exam title**, **Instructions**, **Duration (min)**, then **Add a question** — enter the question, **Type**, **Marks**, **Add option** for each choice and mark the **Correct option key**.
3. Publish the cycle. The public application form is then live at `yourschool.compasse.net/apply`.

Tab: Applicants

- See everyone who applied, with status. Open an applicant to review answers and any entrance-exam score.
- Move an applicant through **shortlisted / accepted / rejected**.
- Accepted applicants can be converted into enrolled students (their details pre-fill the enrolment form).
- Applicants track their own status at `.../apply/status/<their token>`.

2.7 Result configuration & grading

Open **Academics** → **Result settings (ResultConfiguration)**.

- Define the **grade scale**: for each grade (A, B, C...) set the mark range, remark and grade point.
- Set how continuous assessment and exams combine into a term score, pass marks, and what appears on the report card.
- **Add class override** to give a particular class different rules from the school default.

For competency/checkpoint-style reporting, open **Academics** → **Checkpoint Reports** to build **Domains** → **Strands** → **Indicators**, a **Grade scale**, **Checkpoints**, then record **Vitals**, **Grade Entry** and **Comments**, and **Print Report**.

2.8 Finance — the “Finance” screen

Open **Finance** → **Finance**. Four tabs.

Tab: By class / student (fee breakdown)

- **Edit fee breakdown:** list the line items that make up a term's fees (tuition, development levy, etc.) with amounts, per class.

Tab: Fee Records

- **Assign Fee** to one student: choose the **Student**, **Fee Type**, **Amount (₦)**, **Due Date**, optional **Discount** and **Description**.
- **Assign Fee by Class: Select Classes**, optionally limit to certain **arms**, set the breakdown, and the system creates a fee record for every student in those classes.
- Each record shows amount, paid, balance and status (unpaid / partial / paid / waived / overdue).

Tab: Payments

- **Record Payment:** enter the **Fee Record ID** (or pick the student's fee), **Amount (₦)**, **Payment Method** (cash, bank transfer, card, mobile money, cheque), **Reference**, date, and **Recorded By**.
- Saving updates the balance and produces a **Payment Receipt** you can print or send.

Tab: Invoices

- **Create invoice** for ad-hoc charges: **Invoice date**, **Due date**, then line items with **Description**, **Quantity**, **Unit price (₦)**; add **Notes**.

Parents and students can pay online where enabled (2.14 / Part 5).

2.9 Payroll — the “Payroll” screen

Open **Finance** → **Payroll**.

- **Create Payroll Record:** choose the staff member and period, enter salary, allowances and deductions, choose **Payment Method**, and save.
- Staff view their own stubs under **My Portal** → **My Payslips**.

2.10 Attendance oversight — the “Attendance” screen

Open **Operations** → **Attendance**. Tabs: **Mark Attendance**, **Student History**, **Staff Attendance**, **Reports**.

- **Mark Attendance:** pick class, date and session; mark each student present/absent/late/excused; a **Correction Reason** is required when changing a saved record.
- **Staff Attendance:** sign staff in/out or mark leave.

- **Reports:** attendance rates by class or date range.

Teachers mark their own classes here too (Part 3).

2.11 Operations modules

Each of these is a menu item under **Operations** (or its own group). They share the same pattern: a list, an **Add** button, and row actions to edit, delete, or record an event. All are gated by the school's plan.

Transport (Operations → Transport)

Tabs **Vehicles**, **Routes**, **Students**. **Add Vehicle** (plate, capacity, driver), **Add Route** (name, stops, times), **Assign Student** to a route, and **Schedule trip** for a run. Drivers see only their assigned routes.

Hostel (Operations → Hostel)

Tabs **Rooms**, **Allocations**, **Maintenance**. **Add Room** (block, number, capacity, gender), **Allocate Student** to a bed (with **Payment Status**), **Vacate Student**, and **Report Maintenance Issue** → **Mark Resolved** when fixed.

Health / Clinic (Operations → Health)

Tabs **Records**, **Appointments**, **Medications**. **Add Record** for a visit (symptoms, diagnosis, treatment), schedule and then **Record Appointment Outcome**, and log **Medications** given.

Inventory (Operations → Inventory)

Tabs **Items**, **Categories**, **Transactions**. **Create Category**, **Add Inventory Item** (name, category, unit, reorder level), **Record Purchase** to add stock, and **Checkout Item** to issue stock; every movement shows in **Transactions**.

Library (My Portal → Library)

Tabs include **Physical catalog**, **Circulation**, **Digital library / E-books**, **OER & research links**, **Categories**. **Add Book** to the catalogue, **Issue Book** to a borrower and record returns in **Circulation**, and **Add digital resource** for e-books and links. Students get a read-only view with **Quick search**.

Events & Calendar (Operations → Events)

Tabs **Upcoming**, **Calendar**. **Create Event** (title, date/time, audience, location) and **Add Calendar Entry** for term dates and holidays. Events appear on everyone's calendar.

Security (Operations → Security)

Issue Gate Pass (who, reason, valid window), **Check in visitor** (name, host, time in/out), **Report Incident**. Also handles **secure pickup** verification at dismissal.

2.12 Communication — the “Communication” screen

Open **Communication** → **Communication**.

- **Compose Message** — an in-app message to a person, class, or role.
- **Create Notification** — a push/in-app notice.
- **Send Email / Bulk Email** — to a recipient or a whole audience.
- **Send SMS / Send Single SMS / Bulk SMS** — text messages (needs SMS set up in Settings, 2.13).
- **Delivery Logs** — see what was sent and whether it was delivered. **Mark All Read** clears your own unread count.

Meetings and **Livestream** (under Communication) let you **Schedule a meeting** (1:1, class, or staff) and **Schedule livestream** for online classes, including **OBS / RTMP broadcast setup** details.

2.13 Settings — the “School Settings” screen

Open **System** → **Settings**. Tabs:

- **Content** — the public landing page: **Hero Section**, **About Section** (**About Text**, **Mission**, **Vision**), **Contact Information**, **Social Media Links**.
- **Branding** — **Brand Colours**, logo and **Assets** (**Upload images for your landing page**), optional **Custom CSS**.
- **Features / Enabled Sections** — turn public-site sections and **Registration** on or off.
- **Integrations** — **Email (SMTP)** server details and **SMS** provider credentials so the school can send mail and texts under its own name.
- **SEO** — page title, description and keywords for search engines.
- **Signatures** — upload **Stored Signatures**: a **Signatory Name**, **Role**, **Signature Image**, and tick **Set as active signature for this role** so it prints on report cards and receipts.
- **Template** — choose a landing-page layout.

2.14 Subscription & modules

Open **System** → **Settings** → **Subscription** (or **Finance/Subscription** where shown). It displays your current **plan**, renewal date, and which **modules** are switched on (Academic, CBT, Fees, Attendance, Transport, Hostel, Health, Inventory, Events, Livestream, SMS, Email). If a menu item is missing or a screen says a feature is not available on your plan, your subscription does not include that module — contact the platform owner to upgrade.

Part 3 — Teacher

For **Teacher**, **Class Teacher**, **Subject Teacher**, **Year Tutor**, and **HOD**. You see only your classes and subjects.

3.1 Your dashboard

Shows today's periods, classes you own, subjects you teach, recent submissions to mark, and announcements.

3.2 My Timetable

Academics → **My Timetable** — your weekly teaching schedule. (Admins build the master timetable under **Academics** → **Timetable**: set **School period times**, then **Add period** entries per **Class & arm**.)

3.3 My Signature

Academics → **My Signature** — upload a **Signature image** once; it is placed on report cards and documents you sign.

3.4 Classes & Subjects

- **Academics** → **Classes** — see your class list and rosters.
- **Academics** → **Subjects** — your subjects, their enrolled students, and co-teachers.

3.5 CBT / Exams — the “Assessment & CBT” screen

Open **Academics** → **CBT / Exams**. Tabs cover exams, assignments, continuous assessment (CA), results, promotions, psychomotor, scoreboards, and rankings.

Create an exam

1. Tab **Exams** → **Create Exam**.

2. Enter **Title, Subject, Class, Academic Year, Term, Duration (min), Total Marks, Pass Mark, Instructions**, and a date.
3. Save, then **Add Question** for each item: **Question Text, Type, Marks**, the **Options** (tick the **Correct Answer**), and an optional **Diagram / Image**.
4. Or **Bulk upload questions** from a template, or pull from the **Central question bank**.

Create an assignment

Tab **Assignments** → **Create Assignment: Title, Assignment type, Submission type, Instructions, Total Marks, Pass Threshold (%)**, **Due Date**, optional **Teacher**. Students submit online; open **Submissions** to **Grade Submission** with a **Score** and **Feedback**.

Continuous assessment

Tab **CA** → **Create CA** for a class/subject; enter component scores per student.

Marking written exams

Enter raw marks under **Written exam scores (raw marks)** or via the **Scores** screen (3.6).

Results

Tab **Results** → **Generate Results** for a class/term, review the **Class Broadsheet, Class Rankings** and **Top Performers**, add **Class Teacher Comment / Principal Comment**, then **Publish Results** to release them to students and parents. **View Student Result** shows one child's report card.

Psychomotor & affective

Tab **Psychomotor** — rate traits (handwriting, sports, punctuality, neatness...) per student for the report card.

Promotions

Tab **Promotions** — **Auto-Promote** by a pass rule, **Bulk Promote** a list, or **Promote Single Student**; **History** logs past runs.

3.6 Scores & Results — the “Scores” screen

Open **Academics** → **Scores & Results**. Tabs **CA Scores** and **Results**.

- Choose **Academic Year, Term, Class** and optional **Subject**, then **Enter scores** in the grid — one row per student.
- **Bulk Upload** a score sheet from a template (pick the **CA Assessment** target for CA uploads; choose the **Result type**).
- **Publish Results** when ready.

3.7 Checkpoint & class reports

- **Academics → Checkpoint Reports** — enter indicator grades, vitals and comments, then **Print Report**.
- **Academics → Class reports (Teacher Reports)** — **New report**: a periodic narrative report for a class; **Report history** keeps past ones.

3.8 Attendance

Operations → Attendance → Mark Attendance — select your class, date and session, mark each student, and save. Use **Student History** to review a pupil's record.

3.9 Communication & Library

Communication → Communication to message students, parents or colleagues. **My Portal → Library** to search and reserve books.

Part 4 — Student

You see a **My Portal** menu with your own information only.

4.1 Dashboard

Upcoming exams, latest published results, fee balance, timetable snapshot, and school announcements.

4.2 My Courses

My Portal → **My Courses** — tabs **Subjects**, **Assignments**, **Timetable**. See each subject and teacher, open an assignment to read it and submit your work before the **Due Date**, and check your weekly timetable.

4.3 My Exams — taking a CBT

Open **My Portal** → **My Exams**. Available exams are listed with subject, duration, number of questions and marks.

1. Click an exam to open it. Read **Before you begin** (the instructions).
2. If your school requires it, complete **camera identity** — allow the camera and capture the photo asked for. A live proctor may take occasional snapshots during the exam.
3. Click to start. The **timer** counts down from the top.
4. Answer questions one page at a time; use **Next** / **Previous** (or the question list) to move. Answers save as you go.
5. When finished, open **Review your answers**, check anything skipped, then **Submit**. The exam also submits automatically when the timer reaches zero.
6. For objective exams your **score** and **percentage** show immediately; written answers are marked by your teacher and appear later.

4.4 My Results

My Portal → **My Results** — published term results and report cards. Choose the term to view or download. Nothing appears until the teacher **publishes** it.

4.5 My Fees

My Portal → **My Fees** — tabs **Fee Records** and **Payment History**. See what is owed, the due date and balance, your past payments, and (where enabled) a **Pay online** button.

4.6 Messages, Events, Library, Meetings

- **My Portal** → **Messages** — school messages and notices; reply where allowed.
 - **Operations** → **Events** — school calendar.
 - **My Portal** → **Library** — search the catalogue and digital resources.
 - **Communication** → **Meetings** — join online classes/meetings you're invited to.
-

Part 5 — Parent / Guardian

Your **My Portal** menu is built around the child (or children) linked to your account.

5.1 Dashboard

A card per child: attendance rate, latest result, outstanding fees, and recent school messages.

5.2 My Children & switching between them

My Portal → **My Children** lists each linked child. Select a child to “view as” that ward — the sidebar then shows **Ward results**, **Ward courses** and **Fees** for that specific child. A banner at the top shows whose information you are viewing; switch child or exit ward view from there.

5.3 Ward results & courses

- **Ward results** — published report cards and term results for the selected child.
- **Ward courses** — the child’s subjects, teachers, assignments and timetable.

5.4 Fees (Ward Fees)

My Portal → **Fees** — tabs **Fee Records** and **Payment History** for the selected child. Review balances and due dates. Where online payment is enabled, use the **Pay** button; a receipt is issued automatically once payment clears.

5.5 Messages & Events

- **My Portal** → **Messages** — correspondence with the school; you are notified of new messages by email/SMS if the school has that switched on.
 - **Operations** → **Events** — term dates, holidays, PTA meetings and school events.
-

Part 6 — Specialist Staff

Each specialist sees the shared screens (Dashboard, Students list, Communication, Events, My Payslips) plus their own module.

6.1 Accountant

Full access to **Finance** and **Payroll** (see 2.8–2.9): assign fees, record payments, issue receipts and invoices, run payroll, and read finance reports on the dashboard.

6.2 Librarian

Library (2.11): manage the physical catalogue, issue and return books in **Circulation**, curate the **Digital library**, and manage **Categories**. Also has **Inventory** for library stock.

6.3 Nurse

Health / Clinic (2.11): create visit **Records**, manage **Appointments** and **Record Appointment Outcome**, and log **Medications**. Also has **Inventory** for medical supplies. Student medical history is on each **Health Record**.

6.4 Driver

Transport (2.11) limited to assigned routes: view your **Routes** and their stops and students, and record trips/pickups. Your dashboard lists today's runs.

6.5 Security

Security (2.11): **Issue Gate Pass**, **Check in visitor**, **Report Incident**, and verify **secure pickup** at closing — confirming that the adult collecting a student is an approved guardian.

6.6 Housemaster

Hostel (2.11): manage **Rooms** and **Allocations**, move students in and out, and track **Maintenance** requests through to **Mark Resolved**.

6.7 General staff / Caterer / Cleaner

A personal dashboard with payslips (**My Portal** → **My Payslips**), school notices, events, and attendance sign-in.

Part 7 — Platform Owner (Super Administrator)

The company that operates Compasse manages all schools from a separate console.

7.1 Signing in

Go to `https://compasse.net/compasse_super` (the plain platform address, path `/compasse_super`). Sign in with your super-admin email and password. Change the password from **Change Password** in the sidebar.

7.2 The console menu

- **Dashboard** — platform totals: schools, active subscriptions, revenue, recent activity.
- **Tenants** — the schools (each “tenant” is one school with its own database).
- **Schools** — school profiles and contact details.
- **Subscriptions** — every school’s plan, status and renewal.
- **Plans** — the plan catalogue and which modules each plan includes.
- **Email Logs** — every email the platform sent, with delivery status.
- **Job Monitor** — background tasks (school provisioning, bulk sends) and their health.
- **Question Bank** — the central bank of exam questions schools can pull from.

7.3 Creating a new school

1. **Tenants** → **Create Tenant**.
2. Enter **School Name**, a **Subdomain** (lowercase letters, numbers and hyphens — this becomes `subdomain.compasse.net`), **Admin Email**, **Admin Name**, **Phone**, **Address**.
3. Choose a **Subscription Plan**.
4. Click **Create Tenant**. The school’s private database is provisioned in the background; the administrator login is emailed automatically once ready.
5. The new school then follows the setup checklist in **2.1**.

7.4 Managing an existing school

Open it from **Tenants** or **Schools** to: change its plan or module set, suspend or reactivate it (a suspended school shows “Unable to Access School” to its users), update contact details, or inspect its subscription and payment history.

7.5 Plans

Plans — create or edit a plan: name, price, billing cycle, and the list of **modules** it unlocks. Assigning a richer plan to a school immediately widens what its menus show.

Part 8 — Quick Reference & Troubleshooting

8.1 “How do I...?” — task finder

I want to...	Go to	Then
Set the current term	Academics → Classes → Academic Session	Tick Set as current term
Create classes and sections	Academics → Classes → Classes & Arms	Add class, then Arms
Add a subject and its teacher	Academics → Subjects	Add , then Assign to Class
Enrol a student	People → Students → Enroll New Student	Fill form; copy Login Credentials
Enrol a whole class of students	People → Students → Bulk Upload	Download template, fill, upload
Give a teacher a login	People → Teachers → Add Teacher	Credentials shown on save
Open admissions to the public	People → Admissions → New admission cycle	Publish; form at /apply
Set grade boundaries	Academics → Result settings	Edit grade scale
Build fee structure	Finance → By class / student	Edit fee breakdown
Bill a class for fees	Finance → Fee Records → Assign Fee by Class	Select classes / arms
Record a payment	Finance → Payments → Record Payment	Print Payment Receipt
Run payroll	Finance → Payroll → Create Payroll Record	—
Take attendance	Operations → Attendance → Mark Attendance	Select class, date, session
Set an exam	Academics → CBT / Exams → Create Exam	Add Question ×N
Enter/mark scores	Academics → Scores & Results	Enter scores or Bulk Upload
Release results	Academics → CBT / Exams → Results → Publish Results	—
Promote students	Academics → CBT / Exams → Promotions	Auto / Bulk / Single
Message parents	Communication → Compose Message / Bulk SMS / Bulk Email	—
Change school logo & colours	System → Settings → Branding	Upload Assets
Turn on SMS/email sending	System → Settings → Integrations	Enter SMTP / SMS details
Add a report-card signature	System → Settings → Signatures	Set active for role
Take an exam (student)	My Portal → My Exams	Instructions → identity → submit
See my child's report card	My Portal → My Children → select child → Ward results	—
Pay fees online	My Portal → My Fees / Fees	Pay button

I want to...	Go to	Then
Create a school (platform owner)	Tenants → Create Tenant	Choose subdomain + plan

8.2 Common problems

Symptom	Cause	Fix
"No subdomain detected" on login	Opened plain <code>compasse.net</code>	Use <code>yourschool.compasse.net</code>
"Unable to Access School"	Subscription suspended or wrong address	Contact platform owner / check spelling
Sign-in rejected	Wrong email/password, or too many attempts (wait a minute)	Use Forgot password?
A menu item is missing	Your role can't use it, or the plan lacks that module	Ask your admin; admin asks platform owner to upgrade
"Not available on your plan" / access denied on a screen	Module not in subscription	Upgrade the plan
Student can't see results	Teacher hasn't Published them	Publish under Results
Student/parent never got login email	Wrong email or mail not delivered	Students list → envelope icon to resend; check Delivery Logs
Fees not showing for a student	Fee not assigned for current term, or term not set as current	Assign fee; set current term
Bulk upload rejected rows	Data doesn't match the template	Fix the flagged rows and re-upload
SMS/email not sending	Integration not configured	Settings → Integrations
Camera step won't pass in an exam	Browser blocked the camera	Allow camera for the site and retry

8.3 Glossary

- **Tenant** — one school on the platform, with its own isolated database.
- **Subdomain** — the school's short name in its web address (`greenfield` in `greenfield.compasse.net`).
- **Module** — a switchable feature area (Fees, CBT, Hostel...). The subscription **plan** decides which are on.
- **Arm / Section** — a division of a class (JSS1 **A**, JSS1 **B**).
- **CBT** — Computer-Based Testing: exams taken on screen.
- **CA** — Continuous Assessment: term-long marks that combine with the exam for the final score.
- **Broadsheet** — the whole-class results grid for a term.

- **Checkpoint report** — competency-style report using domains, strands and indicators rather than a single mark.
 - **Ward** — the child linked to a parent/guardian account.
 - **Secure pickup** — the security check that only an approved guardian collects a student.
 - **Publish** — the action that makes results visible to students and parents.
 - **Provisioning** — the automatic setup of a new school's database after **Create Tenant**.
-

Part 9 — Worked Case Studies

The earlier parts describe every screen. This part shows how real schools of different kinds actually put those screens together. Each case study uses invented names and follows the school from its first login through one full term. Section numbers in brackets — like (2.3) — point back to the detailed instructions.

Compass is the same product for every school. What differs between a crèche and a senior college is only **which modules are switched on** and **how the academic structure is shaped**. Figure 8 shows the three common shapes.

Case Study A — Sunrise Nursery & Kindergarten

Profile. A small early-years school: Playgroup, Nursery 1, Nursery 2, KG1, KG2 — one class each, about 90 children, 12 staff. No exams. Parents want frequent updates and easy fee payment.

Plan / modules on: Academic, Student, Attendance, Fees, Events, Communication (SMS + Email). Hostel, Transport, CBT, Payroll left off.

Week 0 — setup (the administrator, Mrs Bello)

1. **Settings (2.13)** — uploads the Sunrise logo, sets the brand colour to its orange, fills contact details, writes the **About / Mission / Vision**, and enables **Registration** so parents can enquire from the public site.
2. **Academic session (2.2)** — creates “2025/2026” with three terms; ticks **Set as current academic session** and **Set as current term** on First Term.
3. **Class Levels (2.2)** — Playgroup, Nursery 1, Nursery 2, KG 1, KG 2 with **Sort Order** 1–5.
4. **Classes (2.2)** — one class per level, no arms. Assigns a **Class Teacher** to each.
5. Skips **Departments** and **Subjects** in detail — instead sets up **Checkpoint Reports (2.7): Domains** such as *Language, Number work, Motor skills, Social & emotional*; a few **Indicators** under each; a simple three-point **Grade scale** (“Emerging / Developing / Secure”).

6. **Fee structure (2.8)** — under **By class / student** → **Edit fee breakdown**, enters tuition + feeding + PTA levy per class for First Term.
7. **Staff (2.5)** — adds each teacher and the two admin staff; copies the **Login Credentials** shown on save and hands them out.
8. **Students (2.3)** — enrolls the 90 children with **Enroll New Student**, each with a **Primary guardian** (phone + email). For the 20 new intakes she uses **Bulk Upload** from the CSV template. She e-mails each family its portal login with the **envelope icon** on the student row.
9. **Integrations (2.13)** — enters the school's SMS and SMTP details so messages send under "Sunrise".

During the term

- **Every morning** the class teachers open **Operations** → **Attendance** → **Mark Attendance (2.10)** and tick each child; absences trigger an automatic SMS to the guardian (because Communication is configured).
- **Fridays** teachers add short notes in **Checkpoint Reports** → **Comments**.
- **Fees:** as parents pay at the office, the admin uses **Finance** → **Payments** → **Record Payment (2.8)** and prints the receipt. Parents who prefer to pay online do it from **My Portal** → **Fees (Part 5)**.
- **Events (2.11):** the admin publishes "Mid-term break", "Nativity play", and a "Parents' morning" — they appear on every parent's calendar, and she sends a **Bulk SMS (2.12)** reminder the day before.

End of term

The admin opens **Checkpoint Reports (2.7)**, records **Vitals** (height/weight where taken), completes **Grade Entry** against the indicators, adds the class-teacher **Comment**, and clicks **Print Report** for each child. Parents also see it under **Ward results**. Fee defaulters are found on the **Fee Records** tab (status *overdue*) and chased with a targeted **Bulk SMS**.

Why Compasse suits this school: no exam machinery to wrestle with, attendance and fees take minutes a day, and every parent gets automatic updates without the office making phone calls.

Case Study B — Riverside Primary School

Profile. Primary 1–6, two streams each (A and B), ~520 pupils, 30 teachers. Subjects are taught by the class teacher plus specialists for French, Computer and P.E. Marks-based reports. A school bus runs three routes.

Plan / modules on: Academic, Student, Attendance, Fees, Events, Communication, **Transport**, **Library**, plus simple result recording (CA + exam). CBT and Hostel off.

Setup highlights (Head Teacher's PA, Mr Danjuma)

1. **Session, Levels, Classes & Arms (2.2)** — Primary 1–6; arms **A** and **B** added once and attached to every level via **Quick-add existing section**.

2. **Departments (2.2)** — one catch-all “General” department (primary has no real departments), plus “Languages” and “ICT” for the specialists.
3. **Subjects (2.4)** — English, Mathematics, Basic Science, Social Studies, French, Computer, P.E., Verbal/Quantitative Reasoning. Each is **assigned to every class** and given a **Subject Teacher**; class teachers are added on their own class’s core subjects, specialists on theirs across all classes.
4. **Result settings (2.7)** — grade scale A–F with the school’s boundaries; the term score is set as **40% CA + 60% exam**; pass mark 40.
5. **Fees (2.8)** — a breakdown per level; **Assign Fee by Class** run for all twelve classes at once, with the bus fee added only for children on a route.
6. **Transport (2.11)** — three **Routes** with stops and times; each bus **Vehicle** linked to its **Driver**; **Assign Student** used to place ~140 children on routes. Drivers get logins (2.5) and see only their own route.
7. **Library (2.11)** — the librarian imports the catalogue with **Add Book** and sets **Categories**; pupils get a read-only **Quick search**.

Running a term

- **Continuous assessment:** throughout the term, teachers open **Academics** → **Scores & Results** → **CA Scores (3.6)**, pick their class/subject, and **Enter scores** for each test and assignment. Specialists do the same for their subject across all classes; the **Bulk Upload** option is used for the mid-term test by uploading one sheet per class.
- **Terminal exam:** paper-based. After marking, teachers enter raw marks under **Scores & Results** → **Results (3.6)**. The office cross-checks the **Class Broadsheet** in **CBT / Exams** → **Results (3.5)**.
- **Publishing:** the Head reviews broadsheets, the class teachers add **Class Teacher Comment**, the Head adds **Principal Comment**, then **Publish Results (3.5)**. Pupils and parents see report cards under **My Results / Ward results**.
- **Promotion (2.3 / 3.5):** at session end the office runs **Promotions** → **Auto-Promote** per class with a “average ≥ 40” rule, handling the handful of exceptions with **Promote Single Student**.
- **Attendance & comms** work exactly as in Case Study A; the bus drivers additionally record pickups from their **Transport** view.

Why Compasse suits this school: the marks pipeline (CA → exam → broadsheet → report card → promotion) is built in, and the bus roster stops being a spreadsheet.

Case Study C — Greenfield Secondary School

Profile. JSS1–SS3, four arms per junior class (A–D), senior classes split Science / Arts / Commercial, ~1,240 students, boarding house, three buses, a clinic, a library, ~110 staff. Runs computer-based tests for internal exams. Admissions by entrance exam.

Plan / modules on: everything — Academic, Student, Teacher, **CBT**, Fee + **Payroll**, Attendance, **Transport**, **Hostel**, **Health**, **Inventory**, **Events**, **Communication (SMS + Email)**, **Livestream**.

Setup (School Admin, Mrs Adaeze Obi — the running example in Part 2)

Follows the full checklist (2.1). Points worth noting:

- **Departments (2.2)**: Sciences, Arts, Commercial, Languages, Vocational — each with a **Head of Department**. HODs get the **hod** role and see only their department's subjects, classes and **Class reports**.
- **Classes & Arms (2.2)**: JSS1–JSS3 with arms A–D; SS1–SS3 with arms *Science, Arts, Commercial*. Each arm has a class teacher.
- **Subjects (2.4)**: core subjects assigned to all classes; electives (Further Maths, Government, Accounting, Technical Drawing...) assigned only to the relevant senior arms, with **Manage Enrollment** → **Enroll by Class** for compulsory ones and **Enroll by Student** for electives.
- **Result settings (2.7)**: WAEC-style A1–F9 grade scale; term score **30% CA + 70% exam**; separate **Psychomotor** and affective sections enabled for the report card; **Signatures (2.13)** uploaded for the Principal and each HOD so they print on results.
- **Result configuration overrides (2.7)**: SS3 uses a mock-weighted rule via **Add class override**.

Admissions cycle (2.6)

1. Admin creates the **2025 Intake** cycle (**Opens/Closes** dates, target **Class** JSS1).
2. Builds the entrance exam: **Exam title**, **Duration 60 min**, ~40 questions with **Add a question**, options and **Correct option key**.
3. Publishes; applications come in at greenfield.compass.net/apply. Applicants sit the test online and track status at </apply/status/<token>>.
4. On the **Applicants** tab the admissions officer reviews scores, marks candidates *shortlisted* → *accepted*, and converts the accepted ones straight into enrolled students (details pre-filled).

A boarding student's term — “Chidi, JSS2 B”

- **Hostel (2.11)**: the housemaster uses **Allocate Student** to give Chidi a bed in Blue House, sets **Payment Status**; a broken locker is logged with **Report Maintenance Issue** and later **Mark Resolved**.
- **Transport (2.11)**: not on a route (boarder) — skipped.
- **Fees (2.8)**: **Assign Fee by Class** billed JSS2 tuition; the hostel fee was added for boarders only. Chidi's parent pays online; the receipt is automatic.
- **Health (2.11)**: a malaria visit is recorded by the nurse under **Records**, with **Medications** given and a follow-up **Appointment** whose **Outcome** is recorded two days later.
- **CBT exams (3.5)**: subject teachers **Create Exam** per subject/class, **Add Question** or **Bulk upload questions** / pull from the **Central question bank (2.5-adjacent, Academics)**. Chidi sits each paper from **My Portal** → **My Exams (4.3)** in the computer lab — instructions, camera ID, timed questions, review, submit. Objective scores post instantly; essays are marked by the teacher under **Submissions**.
- **Results (3.5)**: teachers **Generate Results** per class; HODs check **Class Broadsheet**, **Class Rankings**, **Top Performers**; comments added; **Publish Results**. Chidi and his parents open the

report card under **My Results / Ward results**.

- **Promotion (3.5)**: session-end **Auto-Promote** by the pass rule; SS classes handled with the mock-weighted override; borderline cases done with **Promote Single Student**; **History** keeps the audit trail.

Payroll (2.9)

The accountant runs **Create Payroll Record** each month for all staff using the bank details captured on their profiles (2.5); staff view stubs under **My Portal** → **My Payslips**.

Why Compasse suits this school: one system covers admissions, boarding, buses, clinic, CBT and payroll, and the role model keeps HODs, housemasters, nurses and drivers each inside their own lane.

Case Study D — St. Andrew's College (Senior / A-Level)

Profile. A senior-only college: Lower Sixth and Upper Sixth, students taking 3–4 subject combinations, heavy internal testing (fortnightly CBT quizzes plus terminal mocks), ~300 students, day only.

Plan / modules on: Academic, Student, Teacher, **CBT**, Fees, Attendance, Events, Communication, Library. No hostel/transport/clinic.

What is different from a full secondary school

- **Structure (2.2)**: two **Class Levels** (Lower Sixth, Upper Sixth). Instead of arms by ability, “arms” are used as **subject-combination groups** (e.g. *PCM, PCB, Economics/Govt/Lit*). Students are placed in the arm matching their combination.
- **Subjects (2.4)**: every A-Level subject is created once; **Manage Enrollment** → **Enroll by Student** is the norm because each student's basket is individual.
- **CBT as routine (3.5)**: teachers keep a bank of items in the **Central question bank** and spin up a fortnightly quiz in minutes via **Create Exam** → **pull from bank**. The **Scoreboards**, **Class Rankings** and **Top Performers** tabs are used every cycle to spot slippage early.
- **Result settings (2.7)**: grade scale mapped to A*–E; term score weighted heavily toward the **mock** using a class override for Upper Sixth.
- **Reports**: standard marks-based report card plus a **Class report (3.7)** narrative per subject each half-term.
- **Attendance (2.10)** is taken **per lesson**, not per day, because students move between sets.

Why Compasse suits this college: the question bank + CBT loop makes frequent low-stakes testing cheap, and the analytics tabs turn each quiz into early-warning data.

Case Study E — Unity Group of Schools (multi-campus)

Profile. One proprietor, three campuses — Unity Nursery, Unity Primary, Unity College — run as **three separate schools** on Compasse.

How it is organised

- **Three tenants (Part 7).** The platform owner creates each campus with **Tenants** → **Create Tenant (7.3)**: `unity-nursery`, `unity-primary`, `unity-college`, each on the plan that fits it (the nursery on a light plan, the college on the full plan). Each gets its own address, database, logo and admin.
- **Per-campus administrators.** Each campus has its own **School Admin** who runs it exactly as in Case Studies A/B/C. Campuses never see each other's students, fees or staff.
- **Shared question bank.** Subject leads contribute to the platform **Question Bank (7.2)**; each college/primary campus pulls from it when building CBT exams, so item-writing is not duplicated.
- **Group oversight.** The proprietor uses the **super-admin console (7.1)**: the **Dashboard** for group-wide pupil numbers and revenue, **Subscriptions** to watch renewals, **Schools** for contact details, **Email Logs** and **Job Monitor** if a campus reports a delivery problem.
- **Moving a pupil up a campus** (Primary 6 → College) is a fresh enrolment on the College tenant — export the leavers from Primary (a class list) and **Bulk Upload (2.3)** them into College JSS1.

Why Compasse suits this group: hard data separation per campus (a safeguarding and finance boon), with one console for the owner and one shared question bank to cut work.

Day-in-the-life vignettes

A subject teacher on exam day. Signs in → **Dashboard** shows “Physics JSS2 CBT — 09:00”. Opens **CBT / Exams** → **Exams**, confirms the paper and clicks **Publish exam**. During the sitting, watches **Submissions** fill up. After lunch, opens each essay response, enters a **Score** and **Feedback** under **Grade Submission**. Clicks **Generate Results**, eyeballs **Class Rankings**, adds a **Class Teacher Comment**, and leaves **Publish Results** for the HOD to release.

A parent in week one. Gets an SMS with a portal link and temporary password. Signs in at `greenfield.compassse.net`, is prompted to **change password (1.5)**. Opens **My Portal** → **My Children**, selects her son, lands on his **Ward** view: timetable, teachers, and a ₦145,000 balance under **Fees**. Taps **Pay**, completes payment, and the receipt appears in **Payment History**. Turns on nothing else — attendance alerts and result notifications arrive automatically.

The bursar at month-end. **Finance** → **Fee Records**, filters to *overdue*, exports the list, sends a **Bulk SMS** from **Communication**. **Finance** → **Payments** reconciled against the bank statement using each payment's **Reference**. **Payroll** → **Create Payroll Record** run for all staff. Reads the finance figures on the **Accountant dashboard** and reports collection rate to the Principal.

The school nurse, 8 a.m. **Health** → **Appointments** shows two follow-ups. Sees a walk-in, creates a **Record** (symptoms, diagnosis, treatment), issues paracetamol and logs it under **Medications** — stock decrements in **Inventory**. Books a review for Thursday; on Thursday records the **Appointment Outcome**. A child flagged asthmatic shows the alert on their **Health Record**.

End of guide.
