

Compass User Guide

The complete, non-technical handbook for administrators, teachers, students, parents, specialist staff, and platform owners.

School Management Platform · End-User Documentation

Every screen, every task, step by step

Revised 2026-09-06

Contents

Part 1 — Orientation

- 1.1 What Compasse is, and the "portal" idea
- 1.2 What you need to sign in
- 1.3 Signing in
- 1.4 Forgotten password
- 1.5 First login — change the temporary password
- 1.6 The screen — sidebar and main area
- 1.7 Your dashboard
- 1.8 The 18 roles
- 1.9 Modules (plan features)

Part 2 — Your role, in detail

- 2.1 School Administrator (admin` / `school_admin`)
- 2.2 Principal (principal`) and Vice Principal (vice\_principal`)
- 2.3 Head of Department (hod`)
- 2.4 Class Teacher (class_teacher`)
- 2.5 Subject Teacher (subject_teacher`)
- 2.6 Year Tutor (year_tutor`)
- 2.7 Teacher — generic (teacher`)
- 2.8 Student (student`)
- 2.9 Parent / Guardian (guardian` / `parent`)
- 2.10 Accountant (accountant`)
- 2.11 Librarian (librarian`)
- 2.12 Nurse (nurse`)
- 2.13 Driver (driver`)
- 2.14 Security (security`)
- 2.15 Housemaster (housemaster`)
- 2.16 General Staff / Caterer / Cleaner (staff, `caterer`, `cleaner`)

Part 3 — Module reference

- 3.1 Academic Management — "Academics → Classes"
- 3.2 Students — "People → Students"
- 3.3 Teachers — "People → Teachers"
- 3.4 Staff — "People → Staff"
- 3.5 Portal Users — "People → Users"
- 3.6 Role Access — "System → Role access"
- 3.7 Admissions — "People → Admissions"
- 3.8 Recruitment — "People → Recruitment"
- 3.9 Finance — "Finance → Finance"
- 3.10 Payroll — "Finance → Payroll"
- 3.11 Transport — "Operations → Transport"
- 3.12 Hostel — "Operations → Hostel"
- 3.13 Health — "Operations → Health"
- 3.14 Inventory — "Operations → Inventory"

- 3.15 Library — "My Portal → Library"
- 3.16 Events & Calendar — "Operations → Events"
- 3.17 Communication — "Communication → Communication"
- 3.18 Meetings & Livestream — "Communication"
- 3.19 Security — "Operations → Security"
- 3.20 Timetable — "Academics → Timetable"
- 3.21 Assessment & CBT — "Academics → CBT / Exams"
- 3.22 Scores & Results — "Academics → Scores & Results"
- 3.23 Result Settings — "Academics → Result settings"
- 3.24 Checkpoint Reports — "Academics → Checkpoint Reports"
- 3.25 Class Reports — "Academics → Class reports"
- 3.26 Attendance — "Operations → Attendance"
- 3.27 Settings — "System → Settings" (admin / school_admin only)
- 3.28 Subscription — "System → Settings → Subscription"
- 3.29 The "My Portal" screens (students, parents, staff)

Part 4 — Platform Owner console (Super Administrator)

- 4.1 Signing in
- 4.2 The console menu
- 4.3 Dashboard
- 4.4 Creating a school — "Tenants → Create Tenant"
- 4.5 Managing one tenant — "Tenants → (open a tenant)"
- 4.6 Schools & module overrides — "Schools → (open a school)"
- 4.7 Subscriptions — "Subscriptions"
- 4.8 Plans — "Plans"
- 4.9 Email Logs & Job Monitor
- 4.10 Central Question Bank — "Question Bank"
- 4.11 Scenarios

Part 5 — Worked Case Studies

- Case Study A — Sunrise Nursery & Kindergarten
- Case Study B — Riverside Primary School
- Case Study C — Greenfield Secondary School
- Case Study D — St. Andrew's College (Senior / A-Level)
- Case Study E — Unity Group of Schools (multi-campus)
- Day-in-the-life vignettes

Part 6 — Quick reference & troubleshooting

- 6.1 First-day checklist by role
- 6.2 "How do I...?" — task finder
- 6.3 Common problems
- 6.4 Golden rules

Part 7 — Glossary

Compassse User Guide

The complete, non-technical handbook for every person who uses Compassse.

This guide has three layers:

- **Part 1 — Orientation.** How the system works, how to sign in, how to read your screen. Everyone reads this.
- **Part 2 — Your role, in detail.** One chapter per role (there are 18). Each tells you exactly what you see on login, every menu item you have, every task you can do — with the exact buttons, tabs, dialog names and form fields — and several worked scenarios.
- **Part 3 — Module reference.** Every screen in the system, tab by tab, field by field. Use it to look something up.
- **Part 4 — Platform owner console.** For the company that runs Compassse for many schools.
- **Part 5 — Worked case studies.** Whole schools (nursery, primary, secondary, college, multi-campus group) set up and run from scratch.
- **Part 6 — Quick reference & troubleshooting. Part 7 — Glossary.**

On-screen words are written **like this**. Menu paths are written **Group → Item**. A step that only some roles can do is marked (*leadership only*) etc.

Part 1 — Orientation

1.1 What Compasse is, and the “portal” idea

Compassse is a web-based school management system. It replaces the registers, spreadsheets, fee books, mark sheets and notice boards a school runs on. It is used entirely through a web browser — nothing is installed.

Every school on Compassse is completely separate. Each has:

- its **own web address** — `https://YOURSCHOOL.compassse.net`, where `YOURSCHOOL` is the short name (the *subdomain*) picked when the school was created;
- its **own database** — one school can never see another’s students, staff, money or results;
- its **own logo, colours, plan and switched-on features**.

The company that operates Compassse (the *platform owner*) manages all schools from a separate console at `compassse.net/compassse_super` (**Part 4**).

Figure 1 — One Compassse platform hosts many schools. Each school has its own web address and its own isolated data.

1.2 What you need to sign in

- Your school’s web address.
- Your **email** and **password**. Staff get these from the school administrator; students and parents get them from the school office (often by email or SMS with a link).
- Any modern browser on any device.

1.3 Signing in

1. Open your school’s address, e.g. `https://greenfield.compassse.net`.
2. The public home page opens. Click **Sign in**, or go straight to `.../login`.

3. The sign-in card shows **your** school's name and logo. Type your **Email** and **Password** (use the eye icon to check the password).
4. Click **Sign in**. You land on your **Dashboard**, which is built for your role.

Login safeguards. Five wrong attempts in a minute temporarily blocks further tries — wait a minute. Sessions are per-school: a login for one school does not work at another.

The sign-in screen is divided into three main sections:

- Before you sign in:**
 - open YOUR school's web address
 - credentials come from the school office
 - "No subdomain detected" = wrong address
- Central Card:**
 - Logo: Greenfield Secondary (greenfield.compasse.net)
 - EMAIL: you@school.edu.ng
 - PASSWORD: [masked] [Forgot password?](#)
- After you sign in:**
 - your Dashboard opens
 - the sidebar shows only the screens your role is allowed to use
 - first time? change your password (bottom-left)

Figure 2 — The sign-in screen. It always shows your school's own name and logo.

1.4 Forgotten password

1. On the sign-in card click **Forgot password?**.
2. Enter your email, click **Send reset link**.
3. Open the email from Compasse and follow the link to set a new password. (The screen always says "if an account exists, a link has been sent" — it will not confirm whether your address is registered.)
4. No email after a few minutes → check spam, then ask the school office to **resend credentials**.

1.5 First login — change the temporary password

Accounts the school creates start with a temporary password and a note that it must be changed.

1. In the left sidebar, bottom area, click **Change Password**.
2. Enter **Current Password**, then **New Password** (minimum 8 characters) and **Confirm New Password**.
3. Click **Update**. A green confirmation appears.

The same **Change Password** button is in the platform owner console.

1.6 The screen — sidebar and main area

Every screen after sign-in has the same shape.

Left sidebar (your menu). Items are gathered into collapsible groups. The full set of groups is:

Group	Typical items
Overview	Dashboard
People	Admissions, Students, Teachers, Staff, Recruitment, Users
Academics	Classes, Subjects, Timetable, My Timetable, My Signature, CBT / Exams, Scores & Results, Result settings, Checkpoint Reports, Central question bank, Class reports
Operations	Attendance, Transport, Hostel, Health, Inventory, Events, Security
Finance	Finance, Payroll
Communication	Communication, Meetings, Livestream
My Portal	My Payslips, My Courses, My Exams, My Results, Messages, My Fees, Library, My Children, Fees (ward), Ward results, Ward courses
System	Role access, Settings

Click a group header to collapse/expand it. Click the chevron at the bottom of the sidebar to shrink the whole sidebar to icons. The very bottom has: a **light/dark theme** toggle, **Change Password**, and **your name** — click your name to **log out**.

Main area. The screen you chose. On most screens the top-right holds the buttons that create things (**Add...**, **Create...**, **Record...**, **Enroll...**, **Bulk Upload**). Lists have a search box and filter dropdowns; long lists are paged with **Previous / Next**.

You only see what your role and plan allow. The menu is filtered twice: by your **role** (a teacher never sees Finance) and by your school's **plan** (if Hostel is not in the plan, the Hostel item is hidden). Leadership roles always see the full module list even before the plan finishes loading — but the server still enforces the plan, so a blocked screen shows an “not available on your plan” message.

The main area — the screen you picked from the menu
Lists, forms and tabs appear here. Buttons that create things (Add, Create, Record...) sit at the top-right of each screen.

Figure 3 — Every screen has the same shape: grouped menu on the left, the screen you chose on the right. The menu is trimmed to your role and your school's plan.

1.7 Your dashboard

The dashboard is assembled from three things:

1. **Quick-link chips** across the top — one-tap shortcuts to the screens your role uses most. If you hold more than one role, the chips are merged.
2. **Stat cards** — the headline numbers for your role.
3. **Panels** — lists and charts (recent activity, alerts, upcoming events, etc.).

Exactly which cards and panels appear is listed in each role chapter in **Part 2**.

1.8 The 18 roles

#	Role slug(s)	One line
1	admin , school_admin	Runs the whole school
2	principal	Academic + operational head; nearly all admin screens
3	vice_principal	Deputy head; same screens as principal
4	hod	Head of Department — their department only
5	class_teacher	Owens one class register and report cards
6	subject_teacher	Teaches specific subjects across classes
7	year_tutor	Pastoral lead for a year group
8	teacher	Generic teacher (the base for 5–7)
9	student	Own courses, exams, results, fees
10	guardian / parent	Each linked child's information
11	accountant	Fees, invoices, payments, payroll
12	librarian	Library + inventory
13	nurse	Clinic + inventory
14	driver	Assigned transport routes
15	security	Gate passes, visitors, incidents, secure pickup
16	housemaster	Boarding house
17	staff , caterer , cleaner	Personal dashboard: payslips, notices, attendance
18	super admin	Platform owner — manages all schools (Part 4)

Multiple roles. A person can hold several roles (e.g. `subject_teacher` + `hod`). The menu and dashboard become the union of all of them; where a “primary” role must be chosen (for the dashboard layout), the system picks the most senior in this order: admin tier → accountant/librarian/nurse/driver/security → hod → class/subject/year teacher → teacher → housemaster → student → guardian → staff.

1.9 Modules (plan features)

A school's subscription **plan** switches modules on and off. The platform owner can also override modules for one school. The full list:

Module	Unlocks
student_management	Students, Admissions
teacher_management	Teachers
academic_management	Classes, Subjects, Terms, Timetable, Checkpoint & Class reports
cbt	CBT/Exams, Assignments, CA, Scores, Result settings, Central question bank
result_management	Results & report cards
fee_management	Finance, Payroll
attendance_management	Attendance
transport_management	Transport
hostel_management	Hostel
health_management	Health
inventory_management	Inventory
event_management	Events
livestream	Livestream, Meetings
sms_integration / email_integration	SMS / email sending

Extra plan *features* (not modules): Parent Portal, Bulk SMS, Email Notifications, Custom Domain, API Access, Advanced Reports, Multi-School Management, Data Export, Priority Support.

Part 2 — Your role, in detail

Each chapter is self-contained. If you hold more than one role, read each chapter that applies — your menu is the combination.

2.1 School Administrator (`admin` / `school_admin`)

You have the widest access in the school. Principals and Vice Principals (2.2) share almost all of it.

Your dashboard

Quick-link chips: Dashboard · Timetable · Students · Scores & Results · Finance · Attendance · Events · Meetings · Communication.

Stat cards, row 1: Total Students · Total Teachers · Total Parents · Classes · Attendance Today (%).

Row 2: Fees Collected (Month) · Fees Outstanding · New Registrations · Active Exams.

Panels: *Revenue by Month* (bar chart) · *Weekly Attendance Trend* (area chart) · *Recent Activity* · *Alerts & Notices* (auto-raises “Outstanding Fees” if any unpaid this term, and “Low Attendance” if today is below 80%) · *Upcoming events*.

Your menu

Everything: all of **People**, **Academics**, **Operations**, **Finance**, **Communication**, plus **System** → **Role access** and **System** → **Settings** (admin/school_admin only — principals do **not** see Settings).

What only you (and principals) can do

- Create, edit and delete **students, teachers, staff and portal users**; send login credentials.
- Manage **academic structure** (sessions, terms, levels, classes, arms, departments, subjects).
- Run **Admissions** and **Recruitment**.
- Build the **master Timetable** and **Result settings**.
- Full **Finance** and **Payroll**.
- **Role access** permission matrix.
- **Settings** (admin/school_admin only): branding, landing page, integrations, signatures.

Core tasks

Set up the year. Academics → **Classes**:

1. Tab **Academic Session** → **Add** → name (e.g. “2025/2026”), **Start Date**, **End Date**. Add **Terms** with their dates and optional **Next Term Begins**. Tick **Set as current academic session** and, on one term, **Set as current term**.
2. Tab **Class Levels** → **Add** each level with a **Name** and **Sort Order**.
3. Tab **Departments & Subjects** → **Add** each department: **Name**, **Code**, **Description**, **Head of Department**.

4. Tab **Classes & Arms** → **Add** each class: **Level**, **Class Name**, **Class Teacher**, optional **Capacity**.
Add **Arms**: either **Quick-add existing section** (arms are school-wide) or type a new **Section Name**.

Add subjects. Academics → **Subjects** → **Add**: **Subject Code**, name, **Department**, **Credit Units**, **Description**. Then per subject: **Assign to Class** (class + optional **Arm** + **Subject Teacher**); **Manage Teachers** → **Add a teacher** for co-teachers; **Manage Enrollment** → **Enroll by Class** (whole class) or **Enroll by Student** (pick individuals); the **Enrolled** list removes students.

Enrol a student. People → **Students** → **Enroll Student**. See 3.2 for every field. On save a **Login Credentials** box may appear — **Copy** the email/username/password and give them to the family. The row's **envelope icon** re-sends credentials by email later. Use **Bulk Upload** (top-right) for many: download the CSV template, fill, upload, fix any rejected rows.

Add a teacher. People → **Teachers** → **Add Teacher**. Required: **First Name**, **Last Name**, **Email**, **Gender**, **Employment Date**. Optional: **Other Names**, **Staff ID**, **Phone**, **Date of Birth**, **Address**, **Department**, **Qualification**, **Employment Type** (Full/Part time, Contract), and **Bank Name / Account Number / Account Name** (used by Payroll). Save → **Login Credentials** box. On the teacher's profile, **Subject Assignments** → **Add Assignment** links them to a **Subject** + **Class**. The **shield icon** on a row opens **User Permissions** to grant extra permissions to that person.

Add non-teaching staff. People → **Staff** → **Add Staff**: **First/Last Name**, **Role** (accountant, librarian, nurse, driver, security, housemaster, caterer, cleaner, staff), **Employment Date**, **Department**, **Phone**, **Email**, **Status**. Login credentials are shown.

Create a plain login. People → **Users** → **Add portal user**: **Full name**, **Email**, **Role**, **Password**, **Confirm**, **Status**. Good for a second admin or a temporary account. Rows have **Edit portal user** and **Delete user**.

Tune permissions. System → **Role access** → **Permission matrix**: tick/untick a cell where a role meets an action. **New permission** registers a custom one. Changes apply on the user's next page load.

Set grading. Academics → **Result settings**: **Report templates** and **Section settings** — the grade scale (per grade: mark range, remark, points), the CA-vs-exam split, pass mark, and what shows on the report card. **Add class override** gives one class different rules.

Build fee structure & bill. Finance (see 3.9 for full detail). Short version: tab **By class / student** → **Edit fee breakdown** to list line items per class; tab **Fee Records** → **Assign Fee by Class** (choose a **Plan name**, add **Fee breakdown** items, **Select Classes**, optionally **limit to sections (arms)**, set **Due Date**) creates a fee record per student.

Configure sending. System → **Settings** → **Integrations**: **Email (SMTP)** server details and **SMS** provider credentials, so mail and texts go out under the school's name. **Settings** → **Signatures**: upload a **Signature Image** with **Signatory Name** and **Role**, tick **Set as active signature for this role** so it prints on results/receipts.

Scenarios

Scenario — a family enrolls mid-term. People → Students → **Enroll Student**. Fill personal details; **Academic Assignment** = current year/term (pre-filled), **Class** JSS2, **Arm** B. Add **Guardian 1** (Mother,

email required) and **Add Guardian** for the father. Save. The **Login Credentials** box shows the student's email + temp password — you also tick nothing else; the parent's account is created from the guardian email. Copy both, hand to the parent, tell them to change the password on first login. Then **Finance** → **Fee Records** → **Assign Fee** for JSS2 tuition with a due date.

Scenario — a teacher leaves. People → Teachers → open the teacher → **Edit Teacher** → set **Status** = *inactive* (keeps history) or use **Delete Teacher** to remove entirely. Reassign their subjects: Academics → Subjects → each affected subject → **Assign to Class** with a new **Subject Teacher**. If they were a **Class Teacher**, Academics → Classes → **Classes & Arms** → edit the class → new **Class Teacher**.

Scenario — parents complain fees aren't showing. Check **Academics** → **Classes** → **Academic Session**: is the right term ticked **Set as current term**? Then **Finance** → **Fee Records**: was the fee assigned for *this* term? If not, **Assign Fee by Class** again for the current term. Parents see balances under **My Portal** → **Fees** once the record exists.

Scenario — end of session promotion. Academics → **CBT / Exams** → **Promotions** tab. **Auto** sub-tab: pick the source class and year, set the pass rule, run a **dry run** first, review, then run for real. Handle exceptions in **Single. History** logs every run and lets you **undo** a promotion.

2.2 Principal (`principal`) and Vice Principal (`vice_principal`)

You see and do almost everything the administrator does — People, Academics, Operations, Finance, Communication, and **Role access**. The one difference: **System** → **Settings is hidden** (branding, integrations and signatures stay with the administrator).

Your dashboard

Identical to the administrator's (2.1): the school-wide stat cards, revenue and attendance charts, recent activity, alerts, upcoming events.

Where you lead

- **Academic oversight:** approve and **Publish Results** (Academics → CBT/Exams → Results, or Scores & Results), review **Class Broadsheet**, **Class Rankings**, **Top Performers**; add the **Principal Comment** to report cards.
- **Admissions decisions:** People → Admissions → **Applicants** — **approve / reject / waitlist** each candidate, using their **Exam score**.
- **Recruitment decisions:** People → Recruitment — same approve/reject flow for job applicants.
- **Discipline & pastoral:** Operations → Security (incidents), Attendance reports, Communication to parents.
- **Timetable:** Academics → Timetable — set **School period times**, then **Add period** rows per **Class & arm**.

Scenarios

Scenario — results week. Teachers have entered scores. You open **Academics → Scores & Results → Results**, filter to a class/term, check the **Class Broadsheet** and **Class Rankings**. For each class you type a **Principal Comment**, then click **Approve** and **Publish Results**. Students and parents can now see report cards under **My Results / Ward results**. Anything wrong → tell the subject teacher to correct the score; it will need re-generating and re-publishing.

Scenario — admissions shortlisting. People → Admissions → **Applicants** tab, filter **Status = submitted**. Open each applicant to read answers and see the **Exam score**. Click the tick to **approve** strong candidates, the cross to **reject**, or waitlist the borderline ones. Approved applicants can be converted to enrolled students (their details pre-fill Students → Enroll).

Scenario — a low-attendance alert. Your dashboard shows “Low Attendance — today is 72%”. Open **Operations → Attendance → Reports**, find the classes dragging the average, then **Communication → Compose Message** (or **Bulk SMS**) to those class parents.

2.3 Head of Department (**hod**)

You manage one department: its teachers, subjects, classes and reports. You are also usually a subject teacher, so you have that chapter’s screens too (2.6).

Your dashboard (HOD variant of the teacher dashboard)

Stat cards: Dept. Teachers · Dept. Subjects · Dept. Classes · Attendance Marked (Done/Pending) · Pending Tasks. **Panels:** *Today’s Schedule* (your lessons) · *Recent Submissions* (assignments handed in) · *Upcoming events*. **Quick-link chips:** Dashboard · My Timetable · Attendance · Classes · Scores & Results · Checkpoint Reports · Class Reports · Meetings · Events.

Your menu

Academics: Classes, Subjects, CBT / Exams, Scores & Results, Checkpoint Reports, Class reports. Plus **People → Students** (view) and standard Communication / Events / Library.

Tasks

- **See your department’s subjects and staff.** Academics → Subjects — filter to your department; open a subject to see its classes, enrolled students and **Manage Teachers**.
- **Moderate results.** Academics → Scores & Results — review every class in your subjects; check the broadsheet before the principal publishes.
- **Class reports.** Academics → **Class reports → New report** — a periodic narrative for a class you oversee; **Report history** keeps past ones.
- **Question bank.** If your school uses it, contribute items via **Academics → Central question bank** (leadership/HOD) so your department’s teachers can pull from it when building exams.

Scenarios

Scenario — standardising a test. Before the mid-term, you open **Academics → Central question bank**, add 30 vetted Biology items. Your subject teachers then build their exams in **CBT / Exams →**

Create Exam → **Add Question** → **(pull from bank)** instead of writing fresh questions, so every stream sits an equivalent paper.

Scenario — a teacher is behind on marking. Your dashboard's *Recent Submissions* and *Pending Tasks* show a backlog for one class. You open **Academics** → **CBT / Exams** → **Assignments** → **Submissions**, see ungraded work, and message the teacher; if urgent you grade some yourself (**Grade Submission** — enter **Score** and **Feedback**).

2.4 Class Teacher (`class_teacher`)

You own one class's register and report cards, on top of the generic teacher screens (2.8).

Dashboard

Teacher layout: **My Classes** · **My Students** · **Attendance Marked** · **Pending Tasks** · **Upcoming Exams**; panels *Today's Schedule*, *Recent Submissions*, *Upcoming events*.

Signature tasks

- **Daily attendance.** Operations → Attendance → **Mark Attendance**: choose your class, the date and session. Every student defaults to **present**; change individuals to **late** (enter minutes) or **absent** (enter a reason; tick **excused** with notes if applicable). Use **Mark all**: present/late/absent to set the whole class, then adjust. Save. Editing a saved record later requires a **Correction Reason**.
- **Report cards.** Academics → **Scores & Results** — enter/verify **CA Scores** and **Results** for your class; add the **Class Teacher Comment**. **Checkpoint Reports** (younger classes) — record **Vitals**, **Grade Entry** and **Comments**, then **Print Report**.
- **Class reports.** Academics → **Class reports** → **New report**.

Scenarios

Scenario — a normal school morning. Sign in → dashboard shows *Attendance Marked: Pending*. Operations → Attendance → **Mark Attendance** → your class, today, "Morning". Two children are away: set them **absent**, reason "Parent called — sick". One arrives at 8:10: **late**, 15 minutes. **Mark all** was already *present* for the rest. Save — the card flips to *Done*, and absentee SMS goes to those two guardians (if SMS is configured).

Scenario — assembling the terminal report. Academics → **Scores & Results** → **Results** → your class, current term. Subject teachers' scores are in; you eyeball the totals, fix an obviously mistyped mark by telling the subject teacher, then add your **Class Teacher Comment** per student ("A steady term; must improve punctuality"). The principal adds their comment and publishes.

2.5 Subject Teacher (`subject_teacher`)

You teach specific subjects, possibly across several classes. Same base as 2.8.

Menu

Academics: Classes, Subjects, My Timetable, My Signature, CBT / Exams, Scores & Results, Checkpoint Reports, Class reports. Plus Attendance (for classes you teach), Communication, Events, Library, Meetings, My Payslips.

Tasks

- **See your rosters.** Academics → Subjects — your subjects list the enrolled students per class.
- **Create an exam.** Academics → CBT / Exams → **Exams** → **Create Exam: Title, Subject, Class, Academic Year, Term, Duration (min), Total Marks, Pass Mark, Instructions**, date. Save, then **Add Question** per item (**Question Text, Type, Marks, Options** with the **Correct Answer** ticked, optional **Diagram / Image**), or **Bulk Upload** questions, or pull from the **Central question bank**.
- **Create an assignment.** Tab **Assignments** → **Create Assignment: Title, Assignment type, Submission type, Instructions, Total Marks, Pass Threshold (%)**, **Due Date**. Students submit online; **Submissions** → **Grade Submission** with **Score + Feedback**.
- **Continuous assessment.** Tab **CA** → **Create CA** for a class/subject; enter component scores. Or enter them in **Scores & Results** → **CA Scores** (grid) — **Enter scores** per student, or **Bulk Upload** a sheet (choose the **CA Assessment** target and **Result type**).
- **Mark & submit.** Objective questions score automatically; open essay responses under **Submissions** or **Student Responses** and grade them.
- **My Signature.** Academics → My Signature — upload once; it prints on your marked reports.

Scenarios

Scenario — setting a CBT quiz. Academics → CBT / Exams → **Exams** → **Create Exam:** “Chemistry Wk6 Quiz”, SS1 Science, 20 min, 20 marks, pass 10. Save → **Add Question** ×15 (multiple choice, 1–2 marks each, tick the right option). Leave it; on quiz day open the exam and **Publish exam** so SS1 sees it in **My Exams**. Afterwards, **Scores** tab shows every student’s auto-mark; you spot-check two flagged short-answer items under **Student Responses**.

Scenario — an assignment with file upload. **Assignments** → **Create Assignment:** “Lab report — Titration”, submission type *file*, 25 marks, threshold 40%, due Friday. Students attach their PDFs. Monday you open **Submissions**, click each, read the file, enter **Score** and a line of **Feedback**, save. The class average appears at the top.

Scenario — bulk CA entry. You marked 4 class tests on paper. Academics → **Scores & Results** → **CA Scores** → **Bulk Upload:** pick the class, subject, the **CA Assessment** (“Test 3”), download the sheet, paste your marks, upload. The grid fills; **Save**.

2.6 Year Tutor (`year_tutor`)

A pastoral coordinator for a whole year group. Menu and dashboard match the teacher family (2.8); in practice you use:

- **Operations** → **Attendance** → **Reports** — attendance across every class in your year.

- **Academics** → **Scores & Results** and **Checkpoint Reports** — progress across the year group.
- **Communication** — messages and bulk SMS to the year's parents.
- **Academics** → **Class reports** — a year-group summary each term.

Scenario — weekly year-group check. Monday you open **Attendance** → **Reports**, filter to your year, note the two classes below 85%, and send their form teachers a message. Friday you review new **Checkpoint** grades and flag three students for a parent meeting via **Communication** → **Compose Message**.

2.7 Teacher — generic (**teacher**)

The base teaching role (roles 2.4–2.6 all include it). If your account is just **teacher**, this is your full picture.

Dashboard

Stat cards: My Classes · My Students · Attendance Marked (Done/Pending) · Pending Tasks · Upcoming Exams. **Panels:** *Today's Schedule* (with “View full timetable” link) · *Recent Submissions* · *Upcoming events*. **Quick chips:** Dashboard · My Timetable · Attendance · Classes · Scores & Results · Checkpoint Reports · Class Reports · Meetings · Events.

Menu

Academics: Classes, Subjects, My Timetable, My Signature, CBT / Exams, Scores & Results, Checkpoint Reports, Class reports. **Operations:** Attendance, Events. **Communication:** Communication, Meetings. **My Portal:** My Payslips, Library.

Everyday tasks

1. **Check today.** Dashboard → *Today's Schedule*; full week at **Academics** → **My Timetable**.
2. **Take the register** for each class you teach — **Operations** → **Attendance** → **Mark Attendance**.
3. **Set and mark work** — **Academics** → **CBT / Exams** (Exams / Assignments / CA).
4. **Enter scores** — **Academics** → **Scores & Results**.
5. **Message home** — **Communication** → **Compose Message**.
6. **Payslip** — **My Portal** → **My Payslips**.

2.8 Student (**student**)

You have a **My Portal** menu and can see only your own information.

Dashboard

Stat cards: My Subjects · Attendance Rate (%) · Fees Status (Paid/Outstanding) · Upcoming Exams · Class Position (or, if your school uses developmental reports, “Checkpoint”). **Panels:** *Today's Classes* (subject, teacher, time) · *Pending Assignments* (with due dates) · *Upcoming events* · *Recent Results*

(per-subject score cards). **Quick chips:** Dashboard · My Results · My Exams · My Courses · My Fees · Events · Library · Meetings.

Menu

My Portal: My Courses, My Exams, My Results, Messages, My Fees, Library. **Operations:** Events.

Communication: Meetings, Livestream.

Tasks

See your courses. My Portal → My Courses — tabs **Subjects** (each with its teacher), **Assignments** (open one to read it and submit before the **Due Date**), **Timetable** (your week).

Sit a computer-based test. My Portal → My Exams. Each available exam shows subject, duration, question count and marks.

1. Click the exam → read **Before you begin**.
2. If required, do **camera identity**: allow the camera, capture the photo. A live proctor may take snapshots during the test.
3. Start. A **timer** counts down at the top.
4. Answer page by page; move with **Next / Previous** or the question list. Answers save as you go.
5. Open **Review your answers**, check skipped items, then **Submit**. (If the timer hits zero it submits automatically.)
6. Objective score and percentage show immediately; written answers are marked by your teacher later.

Check results. My Portal → My Results — published term results and report cards. Nothing shows until the teacher/principal **publishes**. Choose the term to view or download.

Check fees. My Portal → My Fees — tab **Fee Records** (amount, due date, balance, status) and **Payment History**. Where the school enables it, a **Pay** button lets you pay online; a receipt appears in Payment History.

Messages / library / meetings. My Portal → Messages (school notices; reply where allowed) · **My Portal → Library** (search catalogue and digital resources; request a book) · **Communication → Meetings** (join classes you're invited to).

Scenarios

Scenario — exam day. Dashboard shows “Upcoming Exams: 2”. At 9 a.m. you go to **My Portal → My Exams**, open “Physics JSS2 CBT”. Instructions say 40 questions, 45 minutes. You allow the camera for

the ID check, then start. You flag two hard questions, answer the rest, come back to them, hit **Review**, then **Submit** with 6 minutes left. Score 34/40 shows at once for the multiple-choice part; the two theory questions say “pending”.

Scenario — submitting homework. **My Portal** → **My Courses** → **Assignments** → “Essay: My hometown” (due tomorrow). You type your answer (or attach a file), click submit. It moves to “submitted”. Two days later your teacher’s **Feedback** and score appear on the same screen.

Scenario — paying school fees. **My Portal** → **My Fees** shows ₦120,000 outstanding, due in 5 days. You click **Pay**, complete the online payment, and the balance drops to ₦0; the receipt is in **Payment History**.

2.9 Parent / Guardian (guardian / parent)

Your portal is organised around the child (or children) linked to your account.

Dashboard

Stat cards: My Children (count) · Avg Attendance (%) · Fees Due (₦) · Notifications (unread count).

Panels: *My Children* — a card per child with **Attendance**, **Position** (or “Checkpoints”/“Remarks” depending on the school’s report style) and **Fees** (Paid/Due). *Recent Performance* — latest subject scores per child. *School announcements*. *Upcoming events*. **Quick chips:** Dashboard · My Children · Pay Fees · Messages · Events · Meetings · Attendance.

Menu

My Portal: My Children, Fees (ward), Messages, Library. When you **select a child to view**, extra items appear: **Ward results**, **Ward courses**. **Operations:** Events, Attendance. **Communication:** Meetings.

Tasks

Switch between children. **My Portal** → **My Children** lists each linked child. Click one to “view as” that ward — a banner shows whose data you’re viewing, and **Ward results / Ward courses / Fees** now refer to that child. Change child or exit ward view from the banner.

See report cards. With a child selected → **My Portal** → **Ward results** — published results and report cards for that child only.

See coursework. **My Portal** → **Ward courses** — that child’s subjects, teachers, assignments and timetable.

Pay fees. **My Portal** → **Fees** — tabs **Fee Records** and **Payment History** for the selected child. Review balances and due dates; where enabled, use **Pay**. A receipt is issued automatically once payment clears.

Communicate. **My Portal** → **Messages** — threads with the school; new messages also reach you by email/SMS if the school has that on. **Operations** → **Events** — term dates, holidays, PTA meetings.

Scenarios

Scenario — first week with the portal. You get an SMS with a link and temporary password. You sign in at greenfield.compassse.net, are asked to **change password**. **My Portal** → **My Children** shows your son and daughter. You select your son: **Ward courses** shows his eight subjects and timetable; **Fees** shows ₦145,000 due. You tap **Pay**, finish, and see the receipt. You don't touch anything else — attendance alerts and result notifications arrive on their own.

Scenario — checking on a dip in grades. Dashboard *Recent Performance* shows your daughter's Maths at 48%. You select her, open **Ward results** for the detail, then **My Portal** → **Messages** → **Compose** to her Maths teacher asking for guidance. The reply appears in the same thread and by email.

Scenario — two children, one payment run. Dashboard says "Fees Due ₦310,000". You select child 1 → **Fees** → **Pay** their portion; repeat for child 2. Both receipts land in each child's **Payment History**; the dashboard total drops to ₦0.

2.10 Accountant ([accountant](#))

You run the money: fees, invoices, receipts and payroll.

Dashboard

Stat cards: Fees Collected (Month) · Fees Outstanding · Expenses (Month) · Payroll Due. **Panels:** *Fee Collection Trend* (bar) · *Monthly Expenses* (area) · *Revenue vs Expenses* (line) · *Recent Payments* · *Fee Defaulters* (name, class, amount due) · *Upcoming events*. **Quick chips:** Dashboard · Finance · Payroll · Students · Events · Meetings · Communication · My Payslips.

Menu

Finance: Finance, Payroll. **People:** Students (view). Plus Communication, Events, Meetings, My Payslips.

Tasks (full field detail in 3.9–3.10)

Record a payment. **Finance** → **Payments** → **Record Payment: Fee Record ID** (or pick the student's fee), **Amount (₦)**, **Payment Method** (Bank Transfer / Cash / Card-POS / mobile money / cheque), **Reference (optional)**, **Notes (optional)**. Save → the balance updates and a **Payment Receipt** dialog opens to print or send.

Assign a fee to one student. **Finance** → **Fee Records** → **Assign Fee: Student, Fee Type, Amount (₦), Discount (₦), Due Date**, description.

Bill a whole class. **Finance** → **Fee Records** → **Assign Fee by Class: Plan name, Fee breakdown** items (label + amount), **Select Classes**, optional **limit to sections (arms)**, **Due Date**. On save it reports how many fee records were created.

Edit the fee structure. **Finance** → **By class / student** → **Edit fee breakdown** — the standing line items per class/term.

Raise an invoice. Finance → Invoices → Create invoice: Student, Invoice date, Due date, line items (Description, Quantity, Unit price (R)), notes.

Run payroll. Finance → Payroll → Create Payroll Record: staff member, period, earnings and deductions, Payment Method. Produces a **PAY STUB** each staff member sees under **My Portal** → **My Payslips**.

Scenarios

Scenario — the bursary desk on a busy morning. A parent pays JSS1 tuition in cash. Finance → Payments → Record Payment: you look up the student's fee, enter ₦95,000, method **Cash**, reference "RCPT-4471". Save → the **Payment Receipt** opens; you print it and hand it over. The student's balance is now ₦0 and shows in *Recent Payments* on your dashboard.

Scenario — month-end chase. Dashboard *Fee Defaulters* lists 40 names. Finance → Fee Records, filter status *overdue*, note the totals. Communication → Bulk SMS: paste "phone, name" lines for the defaulters, message "Dear {name}, please clear the outstanding fee before exams. — Bursary". Send.

Scenario — payroll day. Finance → Payroll → Create Payroll Record for each staff member (or the batch flow if present): basic salary, allowances, PAYE and pension deductions, method **Bank Transfer**. Each staff member's **PAY STUB** becomes visible in their portal; your dashboard's *Payroll Due* clears.

2.11 Librarian (librarian)

You run the library and its stock.

Dashboard ("Librarian workspace")

A banner with **Open resource center**. **Stat cards:** Physical titles · Digital items · On loan · Pending requests · Overdue. **Shortcut buttons:** Approve requests · Catalog & departments · Digital library · APA / research help · Circulation desk. **Panels:** *Recent issues* (book, borrower, date) · *Overdue returns* (with days overdue) · *Most borrowed* · a footer count of active borrowers.

Menu

My Portal → **Library** (your main screen), **Operations** → **Inventory** (library supplies), **People** → **Students** (view), Communication, Events, Meetings, My Payslips.

The Library screen — tabs

Home (overview & quick search) · **Physical catalog** (**Add Book**, edit, categorise) · **Circulation** (**Issue Book** to a borrower, record returns, see who has what) · **Digital library** (**Add digital resource** — e-books, OER, links) · **APA & research** (citation help and tutorials) · **Categories** (manage) · **requests** (approve student **book requests**).

Tasks

- **Catalogue a new book.** Library → **Physical catalog** → **Add Book**: title, author, ISBN, category, copies.

- **Lend a book.** Library → **Circulation** → **Issue Book**: pick the book and the borrower (student/staff), set the due date. On return, mark it returned.
- **Approve a request.** Library → **requests** — a student asked for a title from the catalogue; approve to issue, or decline.
- **Add an e-book/link.** Library → **Digital library** → **Add digital resource**.
- **Stock.** Operations → Inventory for physical supplies (see 3.14).

Scenarios

Scenario — new intake of textbooks. 200 copies arrive. Library → **Physical catalog** → **Add Book** for each new title (set the copy count), assign a **Category**. Then as classes collect them, **Circulation** → **Issue Book** per student, or issue in bulk to a class if your build supports it.

Scenario — overdue sweep. Dashboard *Overdue returns* shows 12 books, some 20+ days out. You open **Circulation**, and for each, use **Communication** → **Compose Message** to the borrower (and, for students, their parent) requesting return.

Scenario — a student needs a reserved book. Dashboard *Pending requests: 3*. **Approve requests** → you see “Chidi K. — Things Fall Apart”. A copy is free, so you approve; it moves to *On loan* with Chidi as borrower.

2.12 Nurse (nurse)

You run the clinic.

Dashboard (staff layout, nurse variant)

Stat cards: Clinic visits today · Chronic conditions (students flagged) · Medications due today · plus My Role · Attendance Status · Leave Balance · Unread Notices. **Panels:** *Upcoming Duties* · *Latest Payslip* · *Upcoming events*. **Quick chips:** Dashboard · Health · Students · Events · Meetings · Communication · My Payslips.

Menu

Operations → **Health** (main), **Operations** → **Inventory** (medical supplies), **People** → **Students** (view — each has a **Health Record**), Communication, Events, My Payslips.

The Health screen — tabs

Records (clinic visits) · **Appointments** (scheduled, then **Record Appointment Outcome**) · **Medications** (prescribed/given).

Tasks

- **Log a visit.** Health → **Records** → **Add Health Record**: student, symptoms, diagnosis, treatment, notes. Chronic/allergy flags show on that student’s **Health Record** thereafter.
- **Schedule a follow-up.** Health → **Appointments** → **Schedule Appointment**: student, date/time, reason. On the day, open it → **Record Appointment Outcome**.

- **Prescribe / dispense.** Health → **Medications** → **Prescribe Medication**: student, drug, dose, schedule. Giving stock decrements **Inventory**.
- **Restock.** Operations → Inventory → **Record Purchase**; issue with **Checkout Item**.

Scenarios

Scenario — morning clinic. Dashboard: *Clinic visits today 0, Appointments* has two follow-ups. A walk-in arrives with a headache: Health → **Records** → **Add Health Record** (symptoms “headache, mild fever”, diagnosis “suspected malaria”, treatment “paracetamol given, sent to rest”). Health → **Medications** log the paracetamol; Inventory drops by one. You **Schedule Appointment** for Thursday; on Thursday you **Record Appointment Outcome** “resolved”.

Scenario — a known asthmatic. People → Students → open the student → **Health Record** shows the asthma flag and inhaler note. During games the student wheezes; you **Add Health Record** for the episode and **Record** the reliever given, and message the parent via **Communication**.

2.13 Driver (**driver**)

You see only the routes assigned to you.

Dashboard (staff layout, driver variant)

Stat cards: Trips today · Students on route · plus My Role · Attendance Status · Leave Balance · Unread Notices. **Panels:** *Upcoming Duties · Latest Payslip · Upcoming events*. **Quick chips:** Dashboard · Transport · Events · Meetings · Communication · My Payslips.

Menu

Operations → **Transport** (your routes only), Events, Meetings, Communication, My Payslips.

The Transport screen (driver view)

Shows **My route today** with its stops, times and the students assigned. You confirm pickups/drop-offs and can **Schedule trip** runs. Vehicles and full route management are the administrator’s job (3.11).

Scenarios

Scenario — morning run. Dashboard: *Trips today 1, Students on route 18*. Operations → **Transport** → **My route today** lists the 18 children and their stops in order. As you collect each, you mark them boarded; at school you mark them dropped. A parent messages that their child won’t ride today — you see it under **Communication** and skip that stop.

Scenario — vehicle problem. The bus won’t start. You use **Communication** → **Compose Message** to the administrator and transport officer, and they reassign your students to another vehicle from **Operations** → **Transport** → **Vehicles / Routes**.

2.14 Security (**security**)

You handle the gate, visitors, incidents and safe dismissal.

Dashboard (staff layout, security variant)

Stat cards: Visitors today · Active visitors (on site now) · Incidents (week) · plus My Role · Attendance Status · Leave Balance · Unread Notices. **Panels:** *Upcoming Duties* · *Latest Payslip* · *Upcoming events*.

Quick chips: Dashboard · Security · Events · Meetings · Communication · My Payslips.

Menu

Operations → **Security** (main), Events, Meetings, Communication, My Payslips. You can also open

Operations → **Attendance** for gate checks.

The Security screen — actions

- **Issue Gate Pass** — **Issued to, Type, Reason, Valid from, Valid until.**
- **Check in visitor** — **Name, Person type, Host / Person visiting, Purpose, Phone;** check them out on the way out (this drives “Active visitors”).
- **Report Incident** — **Title, Type, Severity, Location, Description, Notes.**
- **Secure pickup** — at dismissal, verify that the adult collecting a student is a registered guardian before releasing the child.

Scenarios

Scenario — a contractor arrives. Operations → **Security** → **Check in visitor:** Name “A. Bello”, Person type “Contractor”, Host “Bursar”, Purpose “AC repair”, Phone. He’s now an *Active visitor*. When he leaves you check him out; the count drops.

Scenario — a scuffle at break. **Security** → **Report Incident:** Title “Altercation — JSS2”, Type “Behaviour”, Severity “Medium”, Location “Quad”, Description of what happened, Notes on action taken. The principal sees it on their dashboard and in Security.

Scenario — pickup time. A man says he’s collecting “Ada in Primary 3”. You open the child’s record / secure-pickup check; he isn’t a listed guardian. You hold the child, call the office, and only release once a registered guardian is confirmed.

2.15 Housemaster (**housemaster**)

You run a boarding house.

Dashboard

Stat cards: My House · House Members · Discipline Cases · House Points. **Panels:** *Members by Class* · *Recent Discipline Cases* (with severity) · *Inter-House Standings* · *Upcoming events*. **Quick chips:**

Dashboard · Boarding / Hostel · Students · Attendance · Events · Meetings · Communication · My Payslips.

Menu

Operations → **Hostel** (main), **People** → **Students** (view), **Operations** → **Attendance** (house roll-call), Events, Meetings, Communication, My Payslips.

The Hostel screen — tabs

Rooms (**Add Room**: block, number, capacity, gender) · **Allocations** (**Allocate Student** to a bed with a **Payment Status**; **Vacate Student**) · **Maintenance** (**Report Maintenance Issue**; later **Resolve** / **Mark Resolved**).

Scenarios

Scenario — start of term intake. Operations → **Hostel** → **Rooms** are set. For each returning and new boarder, **Allocations** → **Allocate Student** to a bed, set **Payment Status** = paid/pending. Someone leaves boarding mid-term → **Vacate Student** frees the bed.

Scenario — a broken window. **Hostel** → **Maintenance** → **Report Maintenance Issue**: “Broken louvre — Room B4”, priority high. When the artisan fixes it you open it and **Mark Resolved** with a note.

Scenario — evening roll-call. Operations → **Attendance** → your house list → mark each boarder present; flag anyone missing and message the duty master via **Communication**.

2.16 General Staff / Caterer / Cleaner (**staff** , **caterer** , **cleaner**)

A lightweight personal workspace.

Dashboard

Stat cards: My Role · Attendance Status (Present / Not Checked In) · Leave Balance · Unread Notices.

Panels: *Upcoming Duties* · *Latest Payslip* (Gross, Deductions, Net, period) · *Upcoming events*. **Quick**

chips: Dashboard · Payslips · Attendance · Library · Events · Meetings · Communication.

Menu

My Portal → **My Payslips**, **Operations** → **Attendance** (sign in/out), **My Portal** → **Library**, Events, Meetings, Communication.

Scenarios

Scenario — clock in and check notices. Sign in → dashboard says *Not Checked In*. Operations → **Attendance** → sign yourself in; the card flips to *Present*. *Unread Notices: 2* — open **Communication** → **Messages** for the staff briefing.

Scenario — payslip query. **My Portal** → **My Payslips** → open the latest **PAY STUB**. A deduction looks wrong; you **Communication** → **Compose Message** to the accountant with the period and amount.

Part 3 — Module reference

Every screen, tab by tab. Use this to look up a specific field or button.

3.1 Academic Management — “Academics → Classes”

Four tabs.

Academic Session. Add a session: name, **Start Date**, **End Date**, and **Set as current academic session**. Inside each session, add **Terms**: **Term Name**, start/end, **Next Term Begins** (prints on report cards), **Set as current term**. The “current” flags drive fees, results and attendance for the whole school.

Class Levels. Add: **Name**, **Sort Order** (controls list order and promotion sequence). Edit/delete per row.

Departments & Subjects. Add a department: **Name**, **Code**, **Description**, **Head of Department**. Subjects belonging to it are listed here (managed on the Subjects screen).

Classes & Arms. Add a class: **Level**, **Class Name**, **Class Teacher**, **Capacity (optional)**. **Arms** (sections): **Quick-add existing section** (arms are global) or new **Section Name**. Each class row shows its teacher and arm count; edit or delete.

3.2 Students — “People → Students”

List: search by name/admission number; filter **Status** (all / active / inactive / graduated / suspended / withdrawn) and **Class**; paged 20 per page. Summary cards: Total, Active, Inactive, Graduated.

Row actions: **View Profile** (eye), and for leadership: **Edit** (pencil), **Send login credentials** (envelope), **Delete** (trash).

Enroll New Student dialog — three sections:

- *Personal Information:* **First Name ***, **Middle Name**, **Last Name ***, **Admission No. (optional — blank auto-generates)**, **Student email (optional — the login email)**, **Profile Photo** (upload), **Gender ***, **Date of Birth**, **Phone**, **Religion**, **State of Origin**, **Nationality**, **Blood Group** (A±, B±, AB±, O±), **Genotype** (AA, AS, SS, AC, SC), **Address**.
- *Academic Assignment:* **Academic Year**, **Term** (filtered to the year), **Class**, **Arm** (enabled once a class is chosen).
- *Guardians / Parents:* up to two. Per guardian: **First/Last Name**, **Email**, **Phone**, **Relationship** (Father, Mother, Guardian, Uncle, Aunt, Sibling), **Occupation**, **Address**, **Primary guardian** checkbox. **Rule:** if a guardian’s name is filled, an **email is required** (that address becomes the parent login).

Required to save: first name, last name, gender, date of birth, class. On success a **Login Credentials** dialog shows **Email**, **Username** (if any), **Password** — each with a copy button — and a note that the password changes on first login.

Edit Student: names, gender, DOB, **Status**, phone, email, **Admission No.**, **Class**, **Arm**, **Profile Photo**, **Address**.

Bulk Upload: dialog with a downloadable CSV template; upload returns a success count and a list of failed rows with reasons.

3.3 Teachers — “People → Teachers”

Add / Edit Teacher — four sections:

- *Profile Photo* (upload, or Photo URL).
- *Personal:* **First Name ***, **Last Name ***, **Other Names**, **Staff ID**, **Email ***, **Phone**, **Gender ***, **Date of Birth**, **Address**.
- *Employment:* **Department** (or “No Department”), **Qualification**, **Employment Type** (Full Time / Part Time / Contract), **Employment Date ***.
- *Bank Details:* **Bank Name**, **Account Number**, **Account Name** (used by Payroll).

Required: first name, last name, email, gender, employment date. Save shows **Login Credentials**. Row actions: **View** (profile with **Subject Assignments** → **Add Assignment:** Subject + Class), **Edit**, **Permissions** (shield — per-user permission grants), **Send credentials** (envelope), **Delete**. **Bulk Upload** available.

3.4 Staff — “People → Staff”

Add / Edit Staff: **First Name ***, **Last Name ***, **Middle Name**, **Role *** (accountant, librarian, nurse, driver, security, housemaster, caterer, cleaner, staff), **Employment Date ***, **Department**, **Phone**, **Email**, **Status**. Login credentials shown on save. **Login Credentials** and **Subject Assignments** sections appear where relevant.

3.5 Portal Users — “People → Users”

Add portal user: **Full name**, **Email**, **Role**, **Password**, **Confirm**, **Status**. **Edit portal user** / **Delete user** per row. Use for accounts that don’t need a full HR profile.

3.6 Role Access — “System → Role access”

Permission matrix: actions down the side, roles across the top; click a cell to grant/revoke. **New permission** registers a custom permission slug. Enforced by the server; takes effect on the user’s next page load. (Individual overrides for one person are set from that person’s row on Teachers/Staff via the shield icon → **User Permissions**.)

3.7 Admissions — “People → Admissions”

Cycles tab. **New admission cycle:** **Name ***, **Opens**, **Closes**, **Description**, target **Class ***. Row shows status (draft / open / closed) and **Open for registration** / **Close** toggle. Open the cycle to **manage** it: build the entrance **exam** — **Exam title**, **Instructions**, **Duration (min)**, then **Add a question (Type**,

Marks, Add option, Correct option key); set the exam **active / scheduled**. Public form is at `/apply` ; applicants track status at `/apply/status/<token>` .

Applicants tab. Filter by cycle and **Status** (submitted / approved / rejected / waitlisted). Table shows **Exam score** and **Status**. Row actions: **approve** (tick), **reject** (cross), **waitlist**. Approved applicants can be converted to enrolled students.

3.8 Recruitment — “People → Recruitment”

Job openings tab. New job opening: title, description, requirements, closing date. **Applicants tab:** review submissions, **approve / reject**. Public form at `/careers` ; status at `/careers/status/<token>` .

3.9 Finance — “Finance → Finance”

Header stat cards from `/financial/summary` ; a **Monthly Revenue** chart. Four tabs.

By class / student. The standing **fee breakdown**. **Edit fee breakdown** — line items (label + amount) per class/section/student. Sub-views: *By class*, *By class & section*, *By student*.

Fee Records. One row per student fee (amount, paid, balance, status: unpaid / partial / paid / waived / overdue). Buttons:

- **Assign Fee** — **Student**, **Fee Type**, **Amount (₹)**, **Discount (₹)**, **Due Date**, description → one fee record.
- **Assign Fee by Class** — **Plan name ***, **Fee breakdown *** (repeatable label + amount), **Select Classes ***, **Optional: limit to sections (arms)**, **Due Date** → creates a fee record for every student in scope; result toast says how many were created.

Payments. Record Payment — **Fee Record ID**, **Amount (₹)**, **Payment Method** (Bank Transfer / Cash / Card-POS / mobile money / cheque), **Reference (optional)**, **Notes (optional)**. Save → balance updates, **Payment Receipt** dialog opens (print / send). Empty state: “No payments recorded”.

Invoices. Create invoice — **Student**, **Invoice date**, **Due date**, repeatable line items (**Description**, **Quantity**, **Unit price (₹)**), notes. Opens a print view.

3.10 Payroll — “Finance → Payroll”

Create Payroll Record — staff member, period, earnings, deductions, **Payment Method**. Each record renders a **PAY STUB** (with the school name/branding) that the staff member opens under **My Portal** → **My Payslips**. Empty state: “No payroll records”.

3.11 Transport — “Operations → Transport”

Tabs **Vehicles** and **Routes** (plus a driver-only **My route today** view).

- **Add Vehicle / Edit Vehicle** — plate, capacity, assigned driver, status.
- **Add Route / Edit Route** — name, stops, times.

- **Students — {route} — Assign Student** to the route; remove here.
- **Schedule trip** — a dated run on a route.
- **Delete Route / Vehicle** with confirm.

3.12 Hostel — “Operations → Hostel”

Tabs **Rooms, Allocations, Maintenance.**

- **Add Room / Edit Room** — block, number, capacity, gender.
- **Allocate Student** — student + bed + **Payment Status**. **Vacate Student** frees it.
- **Report Maintenance Issue** — title, description, priority; later open it and **Mark Resolved (Resolve: {title})**.

3.13 Health — “Operations → Health”

Tabs **Records, Appointments, Medications.**

- **Add Health Record / Edit Health Record** — student, symptoms, diagnosis, treatment, notes; chronic/allergy flags surface on the student’s **Health Record — {name}** view.
- **Schedule Appointment / Edit Appointment**; open a due one → **Record Appointment Outcome**.
- **Prescribe Medication / Edit Medication** — student, drug, dose, schedule; dispensing decrements Inventory.

3.14 Inventory — “Operations → Inventory”

Tabs **Items, Categories, Transactions.**

- **Create Category** — name, description.
- **Add Inventory Item** — name, category, unit, reorder level.
- **Record Purchase** — adds stock from a purchase (supplier, quantity, cost).
- **Checkout Item** — issues stock to a person/department.
- **Transactions** — every movement in/out. Empty states: “No items found”, “No categories”, “No transactions”.

3.15 Library — “My Portal → Library”

Tabs: **Home** (overview + **Quick search**), **Physical catalog**, **Circulation**, **Digital library**, **APA & research**, **Categories**, and **requests** (staff).

- **Add Book / Edit Book** — title, author, ISBN, category, copies.
- **Issue Book** (staff) / **Request book** (student) — book + borrower + due date.
- **Add digital resource** — e-books, OER, research links.
- Students get a read-only catalogue and can place requests; staff approve them under **requests**.

3.16 Events & Calendar — “Operations → Events”

Tabs **Events**, **Calendar**, **Upcoming**.

- **Create Event / Edit Event** — title, date/time, audience, location, description.
- **Add Calendar Entry** — term dates, holidays, exam windows. Entries appear on every user’s dashboard *Upcoming events* and their **Events** screen.

3.17 Communication — “Communication → Communication”

Messages (Inbox / Sent, search):

- **Compose Message** — **To** (comma-separated user IDs), **Subject**, **Message**, **Priority** (Normal / High / Low). (*Recipients are entered as user IDs — get them from the People screens.*)
- Open a message to see **Recipients** and read status; **Delete Message**.

Notifications — **Create Notification** — **Title**, **Body**, **Type** (Announcement / Assignment / Event / Alert / Reminder), **Target Role** (All / Students / Teachers / Parents / Admins), **Class ID** (optional — blank = school-wide), **Action URL** (optional), **send push** toggle.

Send Email / Bulk Email tabs — recipient(s), subject, body.

Send SMS tab — **Send Single SMS**: **Phone Number**, **Sender ID** (optional), **Message**. **Bulk SMS**: **Sender ID**, **Recipients** (one per line: phone, name), **Message** (use {name} to personalise).

Delivery Logs tab — what was sent and the delivery result. **Mark All Read** clears your own unread badge.

3.18 Meetings & Livestream — “Communication”

- **Meetings** — tabs **All** / **Class** / **Staff** / **1:1**. **Schedule a meeting** — title, type, participants, time. “Your meetings” lists yours.
- **Livestream** — **Schedule livestream** — title, time, class; includes **OBS / RTMP broadcast setup** details for streaming software. “Upcoming & recent sessions” lists them.

3.19 Security — “Operations → Security”

- **Issue Gate Pass** — **Issued to** *, **Type** *, **Reason** *, **Valid from** *, **Valid until** *.
- **Check in visitor** — **Name** *, **Person type** *, **Host / Person visiting**, **Purpose** *, **Phone**; check-out later.
- **Report Incident** — **Title** *, **Type** *, **Severity** *, **Location**, **Description** *, **Notes**.

3.20 Timetable — “Academics → Timetable”

- Set **School period times** (period → start/end).
- **Add period** — **Class & arm**, day, period, subject, teacher, room.

- **Reminders** — optional lesson reminders. Teachers see the result at **Academics** → **My Timetable**; students under **My Courses** → **Timetable**.

3.21 Assessment & CBT — “Academics → CBT / Exams”

Seven tabs. Header cards include a **Published** count.

Exams. **Create Exam / Edit Exam** — **Title, Subject, Class, Academic Year, Term, Duration (min), Total Marks, Pass Mark, Instructions**, date; plus report-card comment fields (**Class Teacher Comment, Principal Comment, Next Term Begins**). Open an exam → **Questions — {title}: Add Question** (**Question Text, Type, Marks, Options — check the correct answer, Diagram / Image (optional)**), **Bulk upload questions** (template), or **Edit Question**. **Scores — {title}, Student Responses — {title}**, and **Delete Exam** also here. CBT sittings can require camera ID and live proctor snapshots (a school setting).

Assignments. **Create Assignment / Edit Assignment** — **Title, Assignment type, Submission type, Instructions, Total Marks, Pass Threshold (%)**, **Due Date, Teacher (optional)**. **Add Question** for quiz-style ones. **Submissions — {title}** → open one → **Grade Submission (Score, Feedback)**. **Delete Assignment**.

CA (Continuous Assessment). **Create CA / Edit CA** — class, subject, term, components. **Add Question** for CBT-style CA. Enter scores here or in Scores & Results.

Psychomotor. Psychomotor & Affective Assessment — per class/term, rate traits (handwriting, sport, punctuality, neatness, etc.) per student for the report card.

Results. **Generate Results** — mid-term (CA only) or end-of-term, per class/term/year. **Publish Results** — makes **approved** results visible to students and parents. **Class Broadsheet** — the full grid; **download CSV / PDF**. Also **Class Rankings, Top Performers, View Student Result, Add Comments, Grade Submission**.

Scoreboards. Live scoreboards/leaderboards per class/subject.

Promotions. Sub-tabs **Single / Bulk / Auto / History**.

- **Promote Single Student** — from class → to class.
- **Bulk Promote** — **from class, to class, student IDs** (comma-separated).
- **Auto-Promote** — rule-based across a class; supports a **dry run** first.
- **History** — every run, with **undo**.

3.22 Scores & Results — “Academics → Scores & Results”

Two tabs, driven by **Academic Year ***, **Term ***, **Class ***, optional **Subject**, and **Result type** (mid-term / end-of-term).

CA Scores. **Enter scores — {assessment}**: a per-student grid; type marks, **Save** (“N score(s) saved”). **Bulk Upload** — choose the **CA Assessment** target and **Result type**, download the sheet, fill, upload.

Results. Shows draft / approved / published rows. **Approve** draft results, then **Publish Results** (dialog) to release. Admins can publish straight from draft. Nothing is visible to students/parents until published.

3.23 Result Settings — “Academics → Result settings”

Report templates and **Section settings.** Define the **grade scale** (per grade: mark range, remark, grade point), the CA:exam weighting, pass mark, and report-card layout. **Add class override — {class}** applies different rules to one class. **Edit {name}** adjusts an existing scale/template.

3.24 Checkpoint Reports — “Academics → Checkpoint Reports”

For developmental/competency reporting (common in early years). Tabs:

- **Setup** — **Add Domain**, **Add Strand** (under a domain), **Add Indicator** (under a strand); **Add grade** to the **Grade scale**; **Add Checkpoint** (assessment point in the term).
- **Indicators** — manage the indicator list.
- **Vitals** — height/weight and similar per student.
- **Grade Entry** — rate each student against each indicator at a checkpoint.
- **Comments** — per-student narrative.
- **Print Report** — the finished developmental report.

3.25 Class Reports — “Academics → Class reports”

New report — a periodic narrative report for a class (attendance summary, conduct, general remarks). **Report history** keeps past ones. Used by class teachers, HODs and year tutors.

3.26 Attendance — “Operations → Attendance”

Four tabs.

Mark Attendance. Pick class, date, session. Statuses: **present** (default), **late** (enter **minutes**), **absent** (enter **reason**; optional **excused** + notes). **Mark all:** present / late / absent, then adjust individuals.

Save. Editing a saved record needs a **Correction Reason**. Summary cards: Present / Absent / Late.

Student History. One student’s attendance record over time.

Staff Attendance. Record Check-In / Record Check-Out for staff; mark leave.

Reports. Attendance rates by class and date range; feeds the admin dashboard trend and low-attendance alert (<80%).

3.27 Settings — “System → Settings” (admin / school_admin only)

Eight tabs:

- **Template** — landing-page layout.
- **Branding** — **Brand Colours**, logo, **Assets** (Upload images for your landing page), **Custom CSS**.

- **Content** — **Hero Section**; **About Section** (**About Text**, **Mission**, **Vision**); **Contact Information**; **Social Media Links**.
- **Social** — social profile links.
- **SEO** — **Search Engine Optimization**: page title, description, keywords.
- **Features** — **Enabled Sections** of the public site; **Registration** on/off.
- **Signatures** — **Stored Signatures**: **Signatory Name**, **Role**, **Signature Image**, **Set as active signature for this role** (prints on results/receipts).
- **Integrations** — **Email (SMTP)** server settings; **SMS** provider credentials.

3.28 Subscription — “System → Settings → Subscription”

Shows **Current Plan**, **Usage**, and **Available Plans**. Read-only for the school beyond viewing; plan changes are made by the platform owner (Part 4). If a screen is blocked, the module isn’t in your plan.

3.29 The “My Portal” screens (students, parents, staff)

Screen	Who	Contents
My Courses	student	tabs Subjects, Assignments, Timetable
My Exams	student	available CBTs; the sit-exam flow (3.21)
My Results	student	published results & report cards by term
My Fees	student	Fee Records + Payment History; Pay where enabled
Messages	student, parent	school message threads
My Children	parent	child list; select one to enter ward view
Ward results / Ward courses	parent (in ward view)	selected child’s results / courses
Fees (ward)	parent	selected child’s Fee Records + Payment History + Pay
My Payslips	all staff	PAY STUB history
My Timetable	teachers	weekly teaching schedule
My Signature	teachers	upload signature image for reports
Library	student, staff	catalogue + digital resources + requests

Part 4 — Platform Owner console (Super Administrator)

The company that operates Compasse manages every school from a separate console. This is not part of any school's portal.

4.1 Signing in

Go to the plain platform address with the path `/compasse_super` — e.g.

`https://compasse.net/compasse_super`. Sign in with your super-admin email and password. **Change Password** is in the sidebar. Logging out returns you to `/compasse_super`.

4.2 The console menu

Item	Purpose
Dashboard	Platform KPIs
Tenants	The schools (one “tenant” = one school + its own database)
Schools	School profiles / contact info / module overrides
Subscriptions	Every school's plan, status and renewal
Plans	The plan catalogue and the modules each unlocks
Email Logs	Every email the platform sent, with delivery status
Job Monitor	Background jobs (provisioning, bulk sends) and their health
Question Bank	The central bank of exam questions schools can subscribe to

4.3 Dashboard

Stat cards: Total Tenants (with active count) · Total Students · Total Teachers · Revenue (~~N~~). **Panels:** *Revenue by Month* (bar) · *Expiring Soon* (schools whose subscription ends within N days, with days left) · *Recent Tenants* (name, plan, status, created).

4.4 Creating a school — “Tenants → Create Tenant”

Fields: **School Name** * · **Subdomain** * (lowercase letters, digits, hyphens — becomes `subdomain.compasse.net`; the form strips invalid characters and previews the URL) · **Admin Email** * · **Admin Name** · **Phone** · **Address** · **Subscription Plan** * (dropdown shows price and billing cycle).

Click **Create Tenant**. The school's database is provisioned in the background; the administrator's login is emailed automatically when it's ready. A toast confirms “provisioning in progress”.

4.5 Managing one tenant — “Tenants → (open a tenant)”

The tenant page shows provisioning status and these actions:

- **Edit Tenant** — name, and **status** (active / **suspended**). A suspended school shows “Unable to Access School” to its users.
- **Retry School Setup** — re-runs provisioning if it failed (button turns red when the database is missing or setup failed).
- **Seed School** — creates/links the school record (**name**, **admin_email**, **admin_name**, **phone**, **address**) if the sync didn’t happen.
- **Sync school** — pushes the tenant into the central `schools` table.
- **Run migrations** — dispatches a database-migration job for that tenant (used after platform updates).
- **Resend Welcome Email** — re-sends the admin’s credentials to a chosen address.
- **Delete Tenant** — removes the tenant (destructive; confirm dialog).

4.6 Schools & module overrides — “Schools → (open a school)”

- **Edit School Info** — name, contact, status (active / suspended).
- **Suspend / Activate** — with a reason.
- **Module & Feature Access** — override exactly which of the 16 **modules** and 9 **features** this one school can use, independent of its plan. Toggle each; **Enable All / Disable All** shortcuts; **Save**. Counter shows “N/16 enabled”.
- **Usage Statistics** — students, staff, storage, etc.
- **Reset admin password** — issues a new temporary password for the school admin.

4.7 Subscriptions — “Subscriptions”

Table of every school’s subscription (plan, status, **end date**). Row actions:

- **Extend Subscription** — enter a number of **days** (default 30); sets status back to active and moves the end date.
- **Change Plan** — pick a new plan for the school (immediately changes which modules its menus show).
- **Cancel Subscription**. A separate **Expiring** view lists subscriptions ending soon.

4.8 Plans — “Plans”

Create Plan / Edit Plan — **name**, **price**, **currency**, **billing cycle**, and the checklist of **modules** (16) and **features** (9) the plan includes. **Delete Plan**. Plans feed the **Create Tenant** dropdown and **Change Plan**.

4.9 Email Logs & Job Monitor

- **Email Logs** — searchable list of every outbound email: recipient, subject, status (sent / failed / queued), timestamp. Use it to confirm a welcome email or credential reset actually went out.
- **Job Monitor** — background jobs (school provisioning, migrations, bulk SMS/email, report generation) with state and errors; **retry** failed jobs.

4.10 Central Question Bank — “Question Bank”

Shared item bank schools can draw on for CBT.

- **Subjects** tab — **Add subject**; **New subject**.
- **Questions** tab — **New question** (text, type, options, correct answer, marks, subject).
- **Subscribe tenant to subject** — grant a specific school access to a subject’s questions. Counters: Active subjects · Active questions · Active subscriptions.

4.11 Scenarios

Scenario — onboarding a new school. Tenants → **Create Tenant**: “Unity College”, subdomain `unity-college`, admin email of the incoming principal, **Plan** = “Full”. Create. Job Monitor shows the provisioning job run green in ~30 seconds. Email Logs shows the welcome email sent. You call the principal to confirm they received the login; they then follow the school set-up checklist (Part 5).

Scenario — a school didn’t pay. Subscriptions → find the school → it’s *past due*. You call them; no response. **Tenants** → **(open)** → **Edit Tenant** → **status = suspended**. Their users now see “Unable to Access School”. When they pay, **Subscriptions** → **Extend Subscription** → **30 days**, and set the tenant back to *active*.

Scenario — a school wants only some features. A primary school is on the “Standard” plan but doesn’t want Hostel or Livestream. **Schools** → **(open)** → **Module & Feature Access** → untick `hostel_management` and `livestream` → **Save**. Those items vanish from that school’s menus; every other Standard-plan school is unaffected.

Scenario — provisioning failed. A new tenant’s page shows a red **Retry School Setup**. You click it; **Job Monitor** shows the re-provision job. If the database still reports missing, you use **Run migrations**, then **Sync school**, then **Resend Welcome Email**.

Part 5 — Worked Case Studies

The earlier parts describe every screen. This part shows how real schools of different kinds actually put those screens together. Each case study uses invented names and follows the school from its first login through one full term. For the exact buttons and fields, see the role chapters in **Part 2** and the module reference in **Part 3**.

Compass is the same product for every school. What differs between a crèche and a senior college is only **which modules are switched on** and **how the academic structure is shaped**. Figure 8 shows the three common shapes.

Case Study A — Sunrise Nursery & Kindergarten

Profile. A small early-years school: Playgroup, Nursery 1, Nursery 2, KG1, KG2 — one class each, about 90 children, 12 staff. No exams. Parents want frequent updates and easy fee payment.

Plan / modules on: Academic, Student, Attendance, Fees, Events, Communication (SMS + Email). Hostel, Transport, CBT, Payroll left off.

Week 0 — setup (the administrator, Mrs Bello)

1. **Settings** — uploads the Sunrise logo, sets the brand colour to its orange, fills contact details, writes the **About / Mission / Vision**, and enables **Registration** so parents can enquire from the public site.
2. **Academic session** — creates “2025/2026” with three terms; ticks **Set as current academic session** and **Set as current term** on First Term.
3. **Class Levels** — Playgroup, Nursery 1, Nursery 2, KG 1, KG 2 with **Sort Order** 1–5.
4. **Classes** — one class per level, no arms. Assigns a **Class Teacher** to each.
5. Skips **Departments** and **Subjects** in detail — instead sets up **Checkpoint Reports: Domains** such as *Language, Number work, Motor skills, Social & emotional*; a few **Indicators** under each; a simple three-point **Grade scale** (“Emerging / Developing / Secure”).
6. **Fee structure** — under **By class / student** → **Edit fee breakdown**, enters tuition + feeding + PTA levy per class for First Term.

7. **Staff** — adds each teacher and the two admin staff; copies the **Login Credentials** shown on save and hands them out.
8. **Students** — enrolls the 90 children with **Enroll New Student**, each with a **Primary guardian** (phone + email). For the 20 new intakes she uses **Bulk Upload** from the CSV template. She e-mails each family its portal login with the **envelope icon** on the student row.
9. **Integrations** — enters the school's SMS and SMTP details so messages send under "Sunrise".

During the term

- **Every morning** the class teachers open **Operations** → **Attendance** → **Mark Attendance** and tick each child; absences trigger an automatic SMS to the guardian (because Communication is configured).
- **Fridays** teachers add short notes in **Checkpoint Reports** → **Comments**.
- **Fees**: as parents pay at the office, the admin uses **Finance** → **Payments** → **Record Payment** and prints the receipt. Parents who prefer to pay online do it from **My Portal** → **Fees (Part 5)**.
- **Events**: the admin publishes "Mid-term break", "Nativity play", and a "Parents' morning" — they appear on every parent's calendar, and she sends a **Bulk SMS** reminder the day before.

End of term

The admin opens **Checkpoint Reports**, records **Vitals** (height/weight where taken), completes **Grade Entry** against the indicators, adds the class-teacher **Comment**, and clicks **Print Report** for each child. Parents also see it under **Ward results**. Fee defaulters are found on the **Fee Records** tab (status *overdue*) and chased with a targeted **Bulk SMS**.

Why Compasse suits this school: no exam machinery to wrestle with, attendance and fees take minutes a day, and every parent gets automatic updates without the office making phone calls.

Case Study B — Riverside Primary School

Profile. Primary 1–6, two streams each (A and B), ~520 pupils, 30 teachers. Subjects are taught by the class teacher plus specialists for French, Computer and P.E. Marks-based reports. A school bus runs three routes.

Plan / modules on: Academic, Student, Attendance, Fees, Events, Communication, **Transport**, **Library**, plus simple result recording (CA + exam). CBT and Hostel off.

Setup highlights (Head Teacher's PA, Mr Danjuma)

1. **Session, Levels, Classes & Arms** — Primary 1–6; arms **A** and **B** added once and attached to every level via **Quick-add existing section**.
2. **Departments** — one catch-all "General" department (primary has no real departments), plus "Languages" and "ICT" for the specialists.
3. **Subjects** — English, Mathematics, Basic Science, Social Studies, French, Computer, P.E., Verbal/Quantitative Reasoning. Each is **assigned to every class** and given a **Subject Teacher**; class

teachers are added on their own class's core subjects, specialists on theirs across all classes.

4. **Result settings** — grade scale A–F with the school's boundaries; the term score is set as **40% CA + 60% exam**; pass mark 40.
5. **Fees** — a breakdown per level; **Assign Fee by Class** run for all twelve classes at once, with the bus fee added only for children on a route.
6. **Transport** — three **Routes** with stops and times; each bus **Vehicle** linked to its **Driver**; **Assign Student** used to place ~140 children on routes. Drivers get logins and see only their own route.
7. **Library** — the librarian imports the catalogue with **Add Book** and sets **Categories**; pupils get a read-only **Quick search**.

Running a term

- **Continuous assessment**: throughout the term, teachers open **Academics** → **Scores & Results** → **CA Scores**, pick their class/subject, and **Enter scores** for each test and assignment. Specialists do the same for their subject across all classes; the **Bulk Upload** option is used for the mid-term test by uploading one sheet per class.
- **Terminal exam**: paper-based. After marking, teachers enter raw marks under **Scores & Results** → **Results**. The office cross-checks the **Class Broadsheet** in **CBT / Exams** → **Results**.
- **Publishing**: the Head reviews broadsheets, the class teachers add **Class Teacher Comment**, the Head adds **Principal Comment**, then **Publish Results**. Pupils and parents see report cards under **My Results / Ward results**.
- **Promotion (2.3 / 3.5)**: at session end the office runs **Promotions** → **Auto-Promote** per class with a “average ≥ 40” rule, handling the handful of exceptions with **Promote Single Student**.
- **Attendance & comms** work exactly as in Case Study A; the bus drivers additionally record pickups from their **Transport** view.

Why Compasse suits this school: the marks pipeline (CA → exam → broadsheet → report card → promotion) is built in, and the bus roster stops being a spreadsheet.

Case Study C — Greenfield Secondary School

Profile. JSS1–SS3, four arms per junior class (A–D), senior classes split Science / Arts / Commercial, ~1,240 students, boarding house, three buses, a clinic, a library, ~110 staff. Runs computer-based tests for internal exams. Admissions by entrance exam.

Plan / modules on: everything — Academic, Student, Teacher, **CBT**, Fee + **Payroll**, Attendance, **Transport**, **Hostel**, **Health**, **Inventory**, **Events**, **Communication (SMS + Email)**, **Livestream**.

Setup (School Admin, Mrs Adaeze Obi — the running example in Part 2)

Follows the full checklist ****. Points worth noting:

- **Departments:** Sciences, Arts, Commercial, Languages, Vocational — each with a **Head of Department**. HODs get the **hod** role and see only their department's subjects, classes and **Class**

reports.

- **Classes & Arms:** JSS1–JSS3 with arms A–D; SS1–SS3 with arms *Science, Arts, Commercial*. Each arm has a class teacher.
- **Subjects:** core subjects assigned to all classes; electives (Further Maths, Government, Accounting, Technical Drawing...) assigned only to the relevant senior arms, with **Manage Enrollment** → **Enroll by Class** for compulsory ones and **Enroll by Student** for electives.
- **Result settings:** WAEC-style A1–F9 grade scale; term score **30% CA + 70% exam**; separate **Psychomotor** and affective sections enabled for the report card; **Signatures** uploaded for the Principal and each HOD so they print on results.
- **Result configuration overrides:** SS3 uses a mock-weighted rule via **Add class override**.

Admissions cycle

1. Admin creates the **2025 Intake** cycle (**Opens/Closes** dates, target **Class** JSS1).
2. Builds the entrance exam: **Exam title**, **Duration 60 min**, ~40 questions with **Add a question**, options and **Correct option key**.
3. Publishes; applications come in at greenfield.compass.net/apply. Applicants sit the test online and track status at [/apply/status/<token>](https://greenfield.compass.net/apply/status/<token>).
4. On the **Applicants** tab the admissions officer reviews scores, marks candidates *shortlisted* → *accepted*, and converts the accepted ones straight into enrolled students (details pre-filled).

A boarding student's term — “Chidi, JSS2 B”

- **Hostel:** the housemaster uses **Allocate Student** to give Chidi a bed in Blue House, sets **Payment Status**; a broken locker is logged with **Report Maintenance Issue** and later **Mark Resolved**.
- **Transport:** not on a route (boarder) — skipped.
- **Fees:** **Assign Fee by Class** billed JSS2 tuition; the hostel fee was added for boarders only. Chidi's parent pays online; the receipt is automatic.
- **Health:** a malaria visit is recorded by the nurse under **Records**, with **Medications** given and a follow-up **Appointment** whose **Outcome** is recorded two days later.
- **CBT exams:** subject teachers **Create Exam** per subject/class, **Add Question** or **Bulk upload questions** / pull from the **Central question bank (2.5-adjacent, Academics)**. Chidi sits each paper from **My Portal** → **My Exams** in the computer lab — instructions, camera ID, timed questions, review, submit. Objective scores post instantly; essays are marked by the teacher under **Submissions**.
- **Results:** teachers **Generate Results** per class; HODs check **Class Broadsheet**, **Class Rankings**, **Top Performers**; comments added; **Publish Results**. Chidi and his parents open the report card under **My Results / Ward results**.
- **Promotion:** session-end **Auto-Promote** by the pass rule; SS classes handled with the mock-weighted override; borderline cases done with **Promote Single Student**; **History** keeps the audit trail.

Payroll

The accountant runs **Create Payroll Record** each month for all staff using the bank details captured on their profiles; staff view stubs under **My Portal** → **My Payslips**.

Why Compasse suits this school: one system covers admissions, boarding, buses, clinic, CBT and payroll, and the role model keeps HODs, housemasters, nurses and drivers each inside their own lane.

Case Study D — St. Andrew's College (Senior / A-Level)

Profile. A senior-only college: Lower Sixth and Upper Sixth, students taking 3–4 subject combinations, heavy internal testing (fortnightly CBT quizzes plus terminal mocks), ~300 students, day only.

Plan / modules on: Academic, Student, Teacher, **CBT**, Fees, Attendance, Events, Communication, Library. No hostel/transport/clinic.

What is different from a full secondary school

- **Structure:** two **Class Levels** (Lower Sixth, Upper Sixth). Instead of arms by ability, “arms” are used as **subject-combination groups** (e.g. *PCM, PCB, Economics/Govt/Lit*). Students are placed in the arm matching their combination.
- **Subjects:** every A-Level subject is created once; **Manage Enrollment** → **Enroll by Student** is the norm because each student's basket is individual.
- **CBT as routine:** teachers keep a bank of items in the **Central question bank** and spin up a fortnightly quiz in minutes via **Create Exam** → **pull from bank**. The **Scoreboards**, **Class Rankings** and **Top Performers** tabs are used every cycle to spot slippage early.
- **Result settings:** grade scale mapped to A*–E; term score weighted heavily toward the **mock** using a class override for Upper Sixth.
- **Reports:** standard marks-based report card plus a **Class report** narrative per subject each half-term.
- **Attendance** is taken **per lesson**, not per day, because students move between sets.

Why Compasse suits this college: the question bank + CBT loop makes frequent low-stakes testing cheap, and the analytics tabs turn each quiz into early-warning data.

Case Study E — Unity Group of Schools (multi-campus)

Profile. One proprietor, three campuses — Unity Nursery, Unity Primary, Unity College — run as **three separate schools** on Compasse.

How it is organised

- **Three tenants (Part 7).** The platform owner creates each campus with **Tenants** → **Create Tenant:** `unity-nursery`, `unity-primary`, `unity-college`, each on the plan that fits it (the nursery on a light plan, the college on the full plan). Each gets its own address, database, logo and admin.

- **Per-campus administrators.** Each campus has its own **School Admin** who runs it exactly as in Case Studies A/B/C. Campuses never see each other's students, fees or staff.
- **Shared question bank.** Subject leads contribute to the platform **Question Bank**; each college/primary campus pulls from it when building CBT exams, so item-writing is not duplicated.
- **Group oversight.** The proprietor uses the **super-admin console**: the **Dashboard** for group-wide pupil numbers and revenue, **Subscriptions** to watch renewals, **Schools** for contact details, **Email Logs** and **Job Monitor** if a campus reports a delivery problem.
- **Moving a pupil up a campus** (Primary 6 → College) is a fresh enrolment on the College tenant — export the leavers from Primary (a class list) and **Bulk Upload** them into College JSS1.

Why Compasse suits this group: hard data separation per campus (a safeguarding and finance boon), with one console for the owner and one shared question bank to cut work.

Day-in-the-life vignettes

A subject teacher on exam day. Signs in → **Dashboard** shows “Physics JSS2 CBT — 09:00”. Opens **CBT / Exams** → **Exams**, confirms the paper and clicks **Publish exam**. During the sitting, watches **Submissions** fill up. After lunch, opens each essay response, enters a **Score** and **Feedback** under **Grade Submission**. Clicks **Generate Results**, eyeballs **Class Rankings**, adds a **Class Teacher Comment**, and leaves **Publish Results** for the HOD to release.

A parent in week one. Gets an SMS with a portal link and temporary password. Signs in at greenfield.compassse.net, is prompted to **change password**. Opens **My Portal** → **My Children**, selects her son, lands on his **Ward** view: timetable, teachers, and a ₦145,000 balance under **Fees**. Taps **Pay**, completes payment, and the receipt appears in **Payment History**. Turns on nothing else — attendance alerts and result notifications arrive automatically.

The bursar at month-end. **Finance** → **Fee Records**, filters to *overdue*, exports the list, sends a **Bulk SMS** from **Communication**. **Finance** → **Payments** reconciled against the bank statement using each payment's **Reference**. **Payroll** → **Create Payroll Record** run for all staff. Reads the finance figures on the **Accountant dashboard** and reports collection rate to the Principal.

The school nurse, 8 a.m. **Health** → **Appointments** shows two follow-ups. Sees a walk-in, creates a **Record** (symptoms, diagnosis, treatment), issues paracetamol and logs it under **Medications** — stock decrements in **Inventory**. Books a review for Thursday; on Thursday records the **Appointment Outcome**. A child flagged asthmatic shows the alert on their **Health Record**.

Part 6 — Quick reference & troubleshooting

6.1 First-day checklist by role

Administrator: change password → Settings (branding, integrations) → Academics → Classes (session, terms, levels, departments, classes, arms) → Subjects → Result settings → Finance fee breakdown → add Teachers & Staff → enrol Students.

Teacher: change password → check **My Timetable** → upload **My Signature** → open **Classes / Subjects** to see rosters → try **Mark Attendance** for one class.

Student: change password → **My Courses** (know your subjects & timetable) → **My Exams** (nothing to do until an exam is published) → **My Fees** (see your balance).

Parent: change password → **My Children** → select each child → skim **Ward courses**, **Ward results**, **Fees** → check **Messages**.

Accountant: change password → **Finance** → **By class / student** (confirm fee breakdown) → **Fee Records** (confirm this term's fees exist) → **Payroll** (bank details on staff profiles).

Specialist (librarian/nurse/driver/security/housemaster): change password → open your one module → skim its tabs → check **My Payslips**.

6.2 “How do I...?” — task finder

I want to...	Go to	Then
Set the current term	Academics → Classes → Academic Session	Tick Set as current term
Create classes and sections	Academics → Classes → Classes & Arms	Add class , then Arms
Add a subject and its teacher	Academics → Subjects	Add , then Assign to Class
Enrol one student	People → Students → Enroll Student	Fill form; copy Login Credentials
Enrol a whole class	People → Students → Bulk Upload	Download template, fill, upload
Re-send a login	People → Students/Teachers	Row envelope icon
Give a teacher subjects	People → Teachers → open → Subject Assignments	Add Assignment (subject + class)
Grant one person an extra permission	People → Teachers/Staff	Row shield icon → User Permissions
Open public admissions	People → Admissions → New admission cycle	Open for registration ; form at /apply
Decide on an applicant	People → Admissions → Applicants	tick = approve, cross = reject, waitlist
Set grade boundaries	Academics → Result settings	edit the grade scale
Build fee structure	Finance → By class / student	Edit fee breakdown
Bill a class	Finance → Fee Records → Assign Fee by Class	plan name, breakdown, select classes
Record a payment	Finance → Payments → Record Payment	prints a Payment Receipt
Raise an ad-hoc charge	Finance → Invoices → Create invoice	line items
Run payroll	Finance → Payroll → Create Payroll Record	per staff member
Take attendance	Operations → Attendance → Mark Attendance	class, date, session; Mark all then adjust
Fix a saved attendance mark	Operations → Attendance	edit → give a Correction Reason
Set an exam	Academics → CBT / Exams → Exams → Create Exam	then Add Question ×N
Set an assignment	Academics → CBT / Exams → Assignments → Create Assignment	students submit online
Grade submissions	CBT / Exams → Assignments → Submissions	Grade Submission (score + feedback)
Enter class scores	Academics → Scores & Results	Enter scores grid or Bulk Upload

I want to...	Go to	Then
Generate & release results	CBT / Exams → Results	Generate Results → Approve → Publish Results
Download a broadsheet	CBT / Exams → Results → Class Broadsheet	CSV or PDF
Promote students	CBT / Exams → Promotions	Auto (dry run first) / Bulk / Single; History to undo
Rate conduct/skills	CBT / Exams → Psychomotor	per student, per term
Message specific people	Communication → Compose Message	To = comma-separated user IDs
Send a school-wide notice	Communication → Create Notification	pick Target Role
Text many parents	Communication → Bulk SMS	lines of <code>phone, name ; {name}</code> personalises
Schedule an online class	Communication → Meetings → Schedule a meeting (or Livestream)	—
Change logo & colours	System → Settings → Branding	upload Assets
Turn on SMS/email	System → Settings → Integrations	SMTP + SMS credentials
Add a report-card signature	System → Settings → Signatures	upload, set active for role
Take an exam (student)	My Portal → My Exams	instructions → camera ID → answer → review → submit
See my child's report card	My Portal → My Children → select child → Ward results	—
Pay fees online	My Portal → My Fees / Fees	Pay
Allocate a hostel bed	Operations → Hostel → Allocations → Allocate Student	set Payment Status
Log a clinic visit	Operations → Health → Records → Add Health Record	—
Issue a book	My Portal → Library → Circulation → Issue Book	book + borrower + due date
Check in a visitor	Operations → Security → Check in visitor	check out on exit
Create a school (platform owner)	Console → Tenants → Create Tenant	subdomain + plan
Suspend / extend a school	Console → Tenants (suspend) / Subscriptions → Extend	—
Give one school extra modules	Console → Schools → Module & Feature Access	toggle + Save

6.3 Common problems

Symptom	Cause	Fix
“No subdomain detected” on login	Opened plain <code>compasse.net</code>	Use <code>yourschool.compasse.net</code>
“Unable to Access School”	Subscription suspended, or address mistyped	Contact the platform owner / check spelling
Sign-in rejected repeatedly	Wrong email/password, or 5+ attempts in a minute	Wait a minute; use Forgot password?
No password-reset email	Wrong address, or mail undelivered	School office resends credentials ; platform owner checks Email Logs
A whole menu group is missing	Your role can’t use it	Correct — that’s by design
One module missing for everyone	Not in the plan (or overridden off)	Admin → platform owner to enable in the plan or per-school
A screen says “not available on your plan”	Same as above	Upgrade plan / enable module
Student/parent can’t see results	Results not published	Teacher/principal: CBT/Exams → Results → Approve → Publish Results
Report card totals look wrong	Wrong CA:exam weighting or grade scale	Academics → Result settings (or a class override); re-generate & re-publish
Fees don’t appear for a student	Fee not assigned for the current term, or wrong term marked current	Set current term; Assign Fee (by Class) for this term
“Assign Fee by Class” created 0 records	No students in the selected classes/arms	Enrol students first, or widen the class/arm selection
Bulk upload rejected rows	Data doesn’t match the template columns/format	Fix the listed rows; re-upload only those
SMS/email not sending	Integration not configured, or no SMS/email module	Settings → Integrations ; confirm the module is on
Bulk SMS ignored some rows	A line wasn’t <code>phone, name</code>	One recipient per line, comma-separated
Camera/identity step won’t pass	Browser blocked the camera	Allow camera for the site; reload; try another browser
Exam submitted with time left but shows “pending”	Written questions await the teacher	Normal — objective marks are instant, theory is marked later
Parent sees no children	Guardian account not linked to a student	Re-enter the guardian (with email) on the student’s profile
New teacher can’t log in	Credentials not delivered / wrong email	Teachers list → envelope icon ; or set a password via Users

Symptom	Cause	Fix
Timetable empty for a teacher	Master timetable not built, or periods not assigned to them	Academics → Timetable → Add period with that teacher
Promotion put students in the wrong class	Wrong rule or target class	Promotions → History → undo; re-run
Platform: new school stuck “provisioning”	Provisioning job failed	Tenant page → Retry School Setup , then Run migrations, Sync school

6.4 Golden rules

- **“Current” term/session drives everything.** If fees, results or attendance look wrong, check the ticked term first.
 - **Nothing reaches students/parents until you Publish.**
 - **Roles + plan filter the menu.** Missing items are almost always intentional.
 - **Credentials show once on creation** — copy them, or re-send with the envelope icon.
 - **Editing a saved attendance mark needs a reason** — this is an audit trail, not a bug.
 - **Schools are sealed from each other.** There is no cross-school view except the platform owner’s KPI totals.
-

Part 7 — Glossary

- **Tenant** — one school on the platform, with its own isolated database. Created by the platform owner.
- **Subdomain** — the school's short name in its address (`greenfield` in `greenfield.compass.net`).
- **Provisioning** — the automatic background setup of a new school's database after **Create Tenant**.
- **Plan** — the subscription that decides which **modules** and **features** a school gets. Set by the platform owner; overridable per school.
- **Module** — a switchable feature area: Students, Academic, CBT, Fees, Payroll, Attendance, Transport, Hostel, Health, Inventory, Events, Livestream, SMS, Email, Results, Teachers.
- **Feature** — a smaller plan add-on: Parent Portal, Bulk SMS, Email Notifications, Custom Domain, API Access, Advanced Reports, Multi-School, Data Export, Priority Support.
- **Role** — what a user is (admin, teacher, student, parent, accountant...). Decides menu and permissions. A user can hold several.
- **Effective roles** — the combined set when someone holds more than one role; the menu is their union.
- **Level** — a rung of the school (JSS1, Primary 4, KG2).
- **Class** — an actual class at a level, with a class teacher.
- **Arm / Section** — a division of a class (JSS1 **A**, JSS1 **B**). Arms are shared school-wide and attached to classes.
- **Department** — a grouping of subjects and teaching staff (Sciences, Arts...), led by an **HOD**.
- **Academic Session / Year** — e.g. "2025/2026". Contains **Terms**.
- **Term** — First/Second/Third term. One session term is marked **current**.
- **CBT** — Computer-Based Testing: exams sat on screen, optionally with camera ID and live proctor snapshots.
- **CA** — Continuous Assessment: term-long marks (tests, assignments) that combine with the exam for the final score, per the **Result settings** weighting.
- **Assignment** — set work students submit online (text or file); graded with a score and feedback.
- **Broadsheet** — the whole-class results grid for a term (downloadable as CSV/PDF).
- **Rankings / Top Performers** — class position tables generated with the results.
- **Psychomotor / Affective assessment** — ratings of skills and conduct (handwriting, sport, punctuality...) for the report card.
- **Checkpoint report** — a developmental report built from **Domains** → **Strands** → **Indicators** and a small grade scale, instead of a single percentage. Used mainly in early years.
- **Generate results** — compile CA + exam into term results (draft).
- **Approve / Publish** — Approve marks drafts ready; **Publish** makes report cards visible to students and parents.
- **Promotion** — moving students up a level at session end (Single / Bulk / Auto, with History and undo).

- **Fee record** — one charge against one student (amount, paid, balance, status).
 - **Fee breakdown / plan** — the set of line items that make up a term's fees for a class.
 - **Invoice** — an ad-hoc bill with line items, separate from standard fees.
 - **Payment** — money received against a fee record; produces a **receipt**.
 - **Pay stub / payslip** — a staff member's monthly pay record (gross, deductions, net).
 - **Ward** — the child linked to a parent/guardian account. "Ward view" = viewing the portal as one child.
 - **Secure pickup** — the security check that only a registered guardian collects a student at dismissal.
 - **Gate pass** — a time-boxed permission for a person to leave/enter.
 - **Allocation (hostel)** — assigning a student to a bed in a room, with a payment status.
 - **Central Question Bank** — the platform-wide pool of exam questions a school can subscribe to by subject.
 - **Job Monitor** — the platform owner's view of background jobs (provisioning, migrations, bulk sends).
-

End of guide.
